Patented Roses

KORDE'S PERFECTA

KING'S RANSOM

See page 1
on insert for
list of Bush
and Climbing
varieties.

All-America Award Winners
have to be better than other
roses. Get these top notch
roses for your Rose Garden.

Brilliant Color

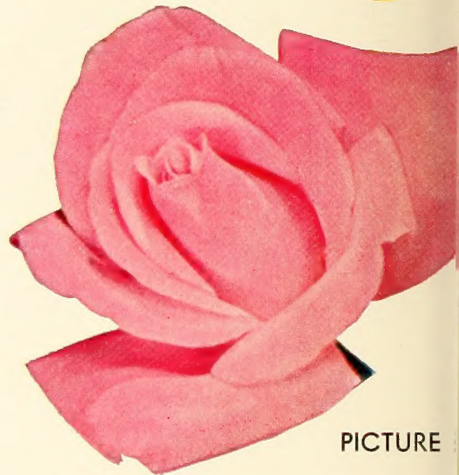

Fancy Leaf

CALADIUM

The brilliant colored leaves that
these bulbs produce is unequalled
in the summer garden, also used
extensively in pot plantings.
These bulbs should be given
very good drainage.

CHRISTIAN DIOR

PICTURE

BLAZE—Fine deep red.

CANDIDUM—Snow white leaf with
green ribs and veins.

CRIMSON WAVE—Crinkled transpar-
ent crimson leaves with deep green
border.

CRESCENT QUEEN—Medium grower,
mingled colors of red and green.

BRILLIANTISSIMO—Deep rose red with
narrow green border.

FANNY MUNSON—Bright crimson, scar-
let ribs, narrow green edge.

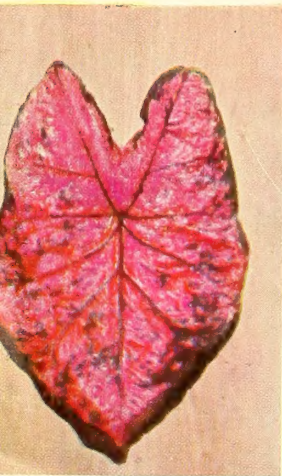

LORD DERBY—Transparent rose colored
leaf with dark ribs and narrow green
edge.

MRS. W. B. HALDEMAN—Bright pink
leaf with green edge.

MISS CHICAGO—Deep crimson red
center, very glossy.

FRED BAUSE—Dark red with green bor-
der. Medium grower.

CANDIDUM

TALISMAN

ROSES for Those Who Want Only the Best

PRESIDENT HOOVER

All Varieties—Grafted, \$1.65 each; 6 for \$7.75, postpaid

All two-year field grown vigorous plants

SET OUT ROSES EARLY IN A WELL PREPARED BED. THE SOIL MUST BE WELL DRAINED AND WELL FERTILIZED. APPLY FERTILIZER TO THE TOP OF THE SOIL. PLANT EARLY FOR BEST RESULTS. G & O IS THE PERFECT ROSE FERTILIZER.

BUSH VARIETIES

WHITE HARDY GARDEN ROSES

CALEDONIA—(H. T.) Long pointed white buds, double, and exquisite rose.

F. K. DRUSCHKI—Large double white, also known as White American Beauty.

PINK HARDY GARDEN ROSES

THE DOCTOR—Bud very large, long pointed flower 4½ inches across, high center, lasting, moderate fragrance, rose-pink.

RADIANCE—(H. T.) Brilliant rose-pink buds, opening in well-formed shining flowers with lighter tints on the reverse of the petals; globular in shape and very fragrant. The plant makes splendid growth, has wonderful blooming qualities.

CHARLOTTE ARMSTRONG—Deep cerise; beautiful for cutting, long stems.

PICTURE—Large buds, clear pink blooms.

YELLOW HARDY GARDEN ROSES

GOLDEN CHARM—Strong, tall, free branching bush, has long, tight slender buds and always perfect. Chrome yellow in color.

ECLIPSE—Chrome yellow, slender urn-shaped, sometimes about two inches long. Vigorous, erect in habit and well foliaged.

TRI-COLORED ROSES (Bush)

PRESIDENT HOOVER—(H.T.) The rose of wonderful colors. It is remarkable for its vigorous growth and beautiful colorings. A blend of orange and pink, varying in tone from coppery-orange and pink, to glowing orange-yellow at the base of the petals, suffused with vivid rose pink.

TALISMAN—It is a combination of shadings of gold, apricot, yellow, deep pink and old rose. The bud is long, well formed and develops into full double flowers. The plant is a strong grower, with glossy green foliage and free flowering.

TERRA-LITE (Vermiculite Plant Aid)

Aids in creating a dependable reservoir of plant root moisture; air-conditions the ground; fluffs stiff soil to prevent cooking, packing and hardening; tends to reduce need for watering and cultivation; provides a satisfactory medium for cuttings, seedlings and transplantings. Ideal for storing bulbs, particularly dahlias and for vegetable winter storage.

Not prepaid 4-qt. pkg. 45c; 1½-bu. bag 89c; 4 cu. ft. bag, \$2.35.

RED HARDY GARDEN ROSES

CRIMSON GLORY—Beautifully shaped buds open into big flowers of velvety red richly shaded with maroon. Vigorous low spreading plant.

ETOILE DE HOLLANDE—(H. T.) Bright crimson, fiery-red center cup-shaped. Free in bloom.

RED RADIANCE—(H. T.) An even better Rose than its parent, Radiance, in habit, bearing big, globular flowers of deep rose-red on strong, individual canes which are freely produced all summer until frost.

GRENOBLE—Large fragrant scarlet blooms.

HARDY CLIMBING ROSES

GOLDEN CLIMBER—Immense deep golden-yellow flowers with the deepest, richest tea fragrance of all roses.

CL. RED RADIANCE—(Cl. H. T.) Exactly like the bush variety of the same name except that it is of climbing habit.

CL. PINK RADIANCE—One of the finest climbers in a good pink.

CL. BLAZE—Marvelous hardy everblooming scarlet red rose. Blooms from early spring until late autumn.

ROSE FOOD

G & O ROSE FOOD—A well balanced, nutritious diet for roses. Feed them the G & O way and your bushes will develop into something you really admire. Full directions with each package; 5 lbs. \$1.50, postpaid; 10 lbs. \$2.00; 25 lbs. \$3.85, not postpaid.

*The Outstanding
ROSES of all Time—
All AARS Winners*

PATENTED ROSES

BUSH

MIRANDY—Deep rich red; fragrant, produces freely on strong, upright stems. One to be added to your rose collection. Price \$2.25.

PEACE—One of the most appealing roses ever introduced. Coppery pink in bud form but when open fully rose is of the softest yellow with pink edging. Price \$2.50.

FORTY-NINER—Bi-color, yellow outside and bright red within. Fragrant. Price \$2.50.

HELEN TRAUBEL—It is a blend of warm pink and apricot with a bright undertone which makes the color sparkle. Long, exquisite buds. Price \$2.75.

CHRYSLER—Lively glowing crimson, with an abundance of rich perfume, beautiful in bud and open flower. Price \$2.50.

MONTEZUMA—Vibrant orange red, very popular. Price \$2.75.

ROUNDELAY—Glowing red, fragrant, long lasting and free blooming. Price \$2.50.

BUCCANEER—Bright yellow. Fine buds and blooms. Price \$2.50.

DUET—New All America Winner for 1961. Bi-color of rich salmon-pink with the reverse of the petals glowing carmine. Price \$3.50.

PINK PARFAIT—Another brand new winner for 1961. Blend of delicate pastels, varying with weather from salmon buff to rich rose-pink at the tips. Price \$3.50.

KORDES PERFECTA—Large double pink, cream at center. Price \$3.50.

GARDEN PARTY—Everblooming hybrid tea. New introduction, large creamy ivory blooms, flushed apple blossom pink at petal edge. Strong, long stems. Price \$3.00.

CHRISTIAN DIOR—(New) Velvety crimson red exceptionally fine for cutting, long stems, tall bush, glossy foliage, a wonderful red rose. Price \$3.50.

KING'S RANSOM—(New) Yellow Hybrid Tea. Breathtaking in color and size of blooms. Long buds, lasting color. Price \$3.50.

FLORIBUNDAS

RED PINOCCHIO—Velvety, carmine red. Medium grower. Price \$1.75.

MA PERKINS—Double flowers, shell pink, bushy. Price \$2.00.

CLIMBERS

CL. PEACE—Palest yellow flushed pink—like the bush Peace Rose, but a wonderful climbing plant. Will make a show-place of your garden. \$2.50 each.

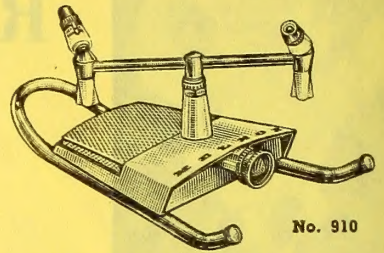

CL. GOLDEN SHOWERS—Large, clear yellow blooms. Price \$2.75.

Systemic insecticide for control of certain insect pests. Simply scatter and water in.

8 oz. \$1.00; 2 lbs. \$2.89.

BERRY-SET

Makes berries grow much larger—often 50% to 100%. Bigger—meatier—sweeter—more luscious tasting. Increases berry yields greatly. Just mix powder with water and spray the open blossoms. One packet enough for several hundred plants.

½ oz. \$0.25 each; 3 oz. \$1.00 each.

MILDEX—For eradication of powdery mildew on Roses, Annuals, Perennials, Vegetables and Nursery Stock. Not to be used with oil, oil base sprays or liquid lime sulphur.

4 oz. \$1.00.

FLORASTREP

Amazing New Antibiotic Solution

The newest scientific discovery, for the Foliar Feeding of Roses and other flowering plants, is the use of the Antibiotic solution "FLORASTREP" as a Growth Impetus" factor.

8 oz. bottle \$1.85.

VAPAM 4-S—

A SOIL FUMIGANT

Kills Nematodes—Weeds—Fungi—Soil Insects

Vapam 4-S is a startlingly effective new soil fumigant that is easy to use. All that is required for best results is that the soil be cultivated, level and smooth, moist to depth of several inches for 5 days and you are ready to apply. Add one quart of Vapam to a sprinkling can and fill with water, stir and sprinkle uniformly over 100 square feet of area. Then, sprinkle with enough water to thoroughly wet the surface.

Five days after treatment cultivate the soil. From 14 to 21 days after application the soil is ready for planting. If, however, rain is experienced during the waiting period an additional 14 days should go by before planting.

Besides nematodes, fungi and soil insects Vapam destroys weeds and even controls nut grass.

Do not apply within three feet of shrubs or plants or within the drip line of large shrubs or trees.

F.O.B. New Orleans. Prices: Qt. \$1.95; gal. \$3.95; 5 gal. drum \$18.00; 30 gal. drum \$96.00.

PANSY PLANTS—Our Pansy Plants are grown from the highest grade of imported seed and grown by a pansy specialist. Large flowering and containing many rare and beautiful colors not generally obtainable. Plant a bed of Pansies from October to January; they begin to bloom immediately.
100, \$2.75, postpaid.

TERSAN

Safe and effective non-mercurial for prevention or control of Brown Patch, Dollar Spot and Snow Mold on golf courses, lawns and other turfs.

8 oz., \$1.95; 2 lbs. \$5.50, postpaid.

CUT YOUR LIVING COSTS

Plant Steckler's Prize Seeds and Trees

—Join Now in the National Health Program

Plant This Spring—Make your home yard an arsenal of health-giving fresh fruits and vegetables. Have plenty to eat and can or sell your surplus. The health of America's citizens is our nation's greatest asset. Eat more fresh vegetables and fruits right from your own yard.

MOTHERS—Make your children strong and healthy with husky bodies and sound minds.

STECKLER SEED CO., Inc.

WE PAY POSTAGE

We pay the postage up to 4th zone on everything offered in this Catalog up to and including 5 pounds on each variety, except where otherwise noted. This means that everything the home gardener requires is delivered to his door free of charge.

QUICK SERVICE—Practically every order is shipped the same day it is received. You can depend upon prompt shipment.

ORDER EARLY—Look through this Garden Book and make your selections without delay so that you can get your order in early and be ready for the first planting days. Complete index below.

THE PRICES QUOTED IN THIS CATALOG are net, and we reserve the right to advance prices without notice should current conditions require it.

WE MAKE NO CHARGE FOR SHIPPING AND CARTING of good to any railroad station, steamship line or express office in New Orleans proper. Also we make no charge for packing, except special for foreign shipments, as tin-lined cases, double sacks, etc., then we charge cost.

SEEDS CAREFULLY TESTED—Every lot of seed we offer for sale is first given a careful test to determine the purity and germination. This test is made in our own seed testing laboratory, or in the state laboratories. When the seed is shipped out we attach to each bag a tag showing the complete analysis.

HOW TO SEND MONEY—Remittance should be made by Postoffice or Express Money Order or by Bank Draft. Personal checks accepted or U. S. Stamps in small amounts.

PLEASE TAKE NOTE OF NEW FOREIGN PARCEL POST RATES

SATISFACTION GUARANTEED . . . or Your Money Refunded

All seeds listed in this catalog are sold subject to meeting YOUR APPROVAL on arrival. You have the privilege of examining them and if you do not find them exactly as represented you are not obligated to keep them. You MUST be absolutely satisfied, or you may return the seed, and we will refund your money.

WARRANTY—Subject to the limitation of liability herein set forth, we warrant that the seeds sold are as described on the container, within tolerances recognized in the vegetable seed production industry. We give no other or further warranty express or implied. In no event shall we be liable for any loss due to the failure, impairment or quality thereof or variety variance therein, whether on warranty or for negligence or otherwise in any amount exceeding the purchase price of the seeds sold. The Buyer's exclusive remedy in all cases shall be recovery of not to exceed the amount of such purchase price.—STECKLER SEED CO., INC.

DO YOU WANT THIS CATALOG?—Be sure to send us an order for seed if you want this catalog next year. If you do not send us an order your name is taken from our mailing list, believing you have changed your address, or you may have come to the store where you get a catalog at the counter. We prefer to have you on our list as an annual customer; then you will always get our catalog as soon as it comes from the press.

WHEN YOU CHANGE YOUR ADDRESS NOTIFY US IF YOU WANT THIS CATALOG.

Include Some of These Better Varieties In Your Garden

ARTICHOKES

Culture—Planting time, Southern States: Sow seeds in seed bed from December to June, 1½ ounces of seed to 150 feet of row 3 inches apart in the row and rows 1 foot apart (will produce 150 plants). Cover ½ inch with earth. Transplant in October to open ground 1½ feet apart in rows and rows 3 feet apart.

LARGE GREEN GLOBE—French grown. Pkt., 20c; oz. \$1.00 postpaid.

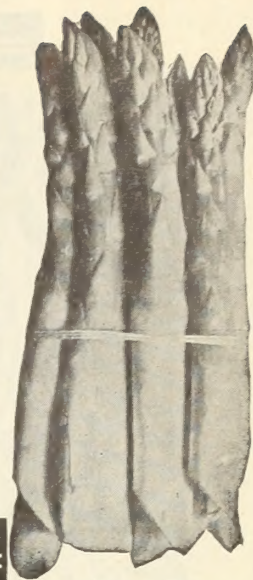

Grow Them from Steckler's High Quality Seeds

ASPARAGUS

Culture—Planting time, Southern States: Sow seed January to April in seed bed, 4 ounces of seed to 150 feet of row, 2 inches deep in rows 18 inches apart (will produce about 800 plants). Transplant to specially prepared Asparagus beds December to February, 12 inches deep, 24 inches apart in rows 4 feet apart. Send for book on Asparagus Culture, \$2.75, postpaid.

MARY WASHINGTON—Result of development by U. S. Department of Agriculture to produce a rust-resisting vigorous strain of Giant Asparagus. Pkt., 10c; oz., 35c; ¼ lb., 75c; lb., \$2.25, postpaid.

MARY WASHINGTON ASPARAGUS ROOTS, 12 for 85c; 25 for \$1.45, postpaid. Not prepaid, 100 for \$3.00.

ASPARAGUS

GARDEN BEANS

TENDERGREEN

Culture—Planting time, Southern States: Spring, January to May; Fall, August to November. Plant 1 pound to 150 feet of row 1¼ bushels to one acre; drop two beans every two or three inches in rows; 1½ feet apart, cover one inch with earth. Average production green beans about 100 bushels per acre.

BOUNTIFUL—53 days. Pods longer than Black Valentines and flat. A prolific bearer, absolutely stringless at all stages, the very best for private and shipping purposes.

CONTENDER—54 days. A recent introduction, with resistance to common bean mosaic and powdery mildew. Pods are stringless, round and seed buff lightly mottled. Ideal for home, marketing and shipping.

SNAP BEANS, DWARF or BUSH—GREEN PODDED

Height of bush 15 to 25 inches. All varieties marketed as green beans except Red Kidney and White Navy or Boston which are left to mature.

ASGROW BLACK VALENTINE STRINGLESS—48 days. An improved selection of the old Black Valentine which is stringless and yet retains the valuable quality of the old type of being immune to damage by light frosts.

TENDERGREEN—53 days. Desirable for home and market garden. Pods round, fleshy, dark green, strictly stringless, of fine quality. Seeds brown, mottled and blotched with light fawn. An improvement on Full Measure.

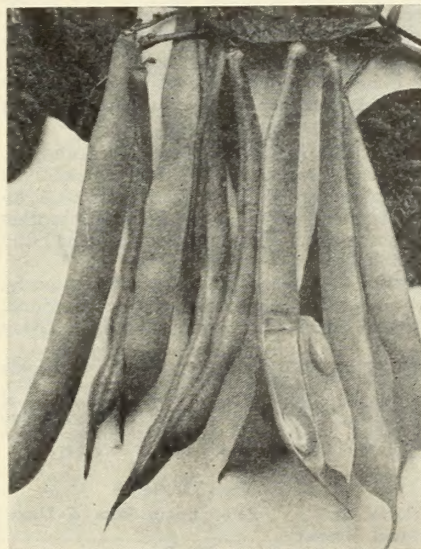

TENN. GREEN POD—50 days. Good home garden variety, dark green, slightly stringy, but very flavorful.

HARVESTER—A white seeded, green podded bush Snap Bean. Stringless, medium green color, pods medium long. Plants are upright, about 18 inches tall, late maturing and a good shipping bean.

TOP CROP—50 days. Mosaic resistant, heavy yielding. Round pods—5½ to 6 inches long and very meaty pods.

NEW LONGVAL—High yielding, mosaic resistance, drought and heat tolerant. Straight oval pods, dark emerald-green. Plants about 16½ inches.

RED KIDNEY—Left to maturity. A red kidney-shaped bean used for baking and soup.

TOP CROP

BUSH WAX BEANS

Height of Bush 15 to 25 Inches
IMPROVED GOLDEN WAX—48 days. Used largely by home gardeners; heavy bearer, vigorous grower. Pods large yellow, solid, brittle and waxy texture, and absolutely stringless. A good rust resisting variety.

BUSH LIMA BEANS

Height of Bush 15 to 25 Inches
NEW CALICO or JACKSON WONDER BUSH BUTTER—65 days. Pods short, used also for shelling. Name "Calico" derived from appearance at maturity. An excellent Southern bean, both for family use and for shipping, cannot be too highly recommended.

BURPEE'S BUSH LIMA—77 days. Plants are uniform dwarf, vigorous and productive, pods medium green, very large, about five inches long. An extensively used bush lima.

HENDERSON'S BUSH or BABY LIMA—68 days. Extremely early, hardy and productive, pods are medium dark green, short, flat, of excellent quality either green-shelled or dry. Much used by canners.

THOROGREEN—A new green seeded small bush lima of the Henderson type. Strong grower, more prolific and with slightly larger seeds.

POLE LIMA BEANS

KENTUCKY WONDER

SNAP BEANS—POLE or RUNNING GREEN POD

Use poles 5 to 8 feet long, set in rows 4 feet apart, plant 6 beans around pole. Half pound plants 150 hills; half bushel to one acre.

IDEAL MARKET—58 days Thrifty and extremely prolific, yields better than other varieties of pole beans, thick, stringless pods, meaty, tender and excellent flavor, perfectly round. Excellent for shipping and for home use.

IMPROVED KENTUCKY WONDER or OLD HOMESTEAD—65 days. Early, very prolific sort of excellent quality. Vines are vigorous, very productive, comparatively straight. Best quality for home use and for shipping purposes.

McCASLAN POLE—65 days. Strong climber, hardy, prolific over long season. Pods dark green, thick, flat, meaty, almost stringless, tender and of a delicious flavor. Seeds ivory white.

STRIPED CREASEBACK—73 days. A very hardy and productive green podded bean. Pods long, very cylindrical or completely rounded, distinctly crease-backed, very fleshy and of excellent quality. Very good shipper.

CAN FREEZER—Pole Bean with a medium vine. Pods straight, stringless, dark green, excellent for freezing.

WHITE CREASEBACK—63 days. Green podded variety, valuable for its earliness, vigorous grower, pods are medium length, comparatively straight. They are of the best quality.

YARD LONG—60 days. Pods average about 2 feet in length, very slender. Should be planted in every garden, due to its being prolific, tender and for its unusual flavor. A few beans make a family dish.

STRINGLESS KENTUCKY WONDER GREEN PODDED POLE BEANS—A new 65-day variety, unexcelled for flavor, texture and quality. Strictly stringless, vines are vigorous and uniform, very productive, bearing its pods in large clusters. Include some of these fine new Stringless Kentucky Wonders in your garden.

POLE LIMA BEANS

CAROLINA or SEWEE—77 days. Very early and reliable pole lima especially adapted for planting in the South. Vigorous growing, and pods dark green, short, about three inches and curved. Highly recommended for home and shipping purposes.

SPOTTED or FLORIDA BUTTER—78 days. Larger pods than Carolina, very prolific, in

great demand by Southern gardeners and for home consumption.

SOUTHERN WILLOW LEAF—82 days. Similar to the Sewee but a heavier yielder, early and prolific, leaves are willow leaf in shape and produce pods from the bottom to the very top of vine. Hardy and drought-resistant, thrives in sandy land, good shipper.

KING OF THE GARDEN—88 days. A true large lima pole bean, vigorous grower, extra large greenish white beans. Late variety and extensively planted.

POLE WAX BEANS

KENTUCKY WONDER POLE WAX—68 days. An early and attractive sort, one of the best of wax-padded snap pole beans. Pods are six to eight inches long, very good quality and highly recommended for shipping and home use.

WINDSOR BEANS

ITALIAN or ENGLISH—Long variety. 75 days. Plant about two beans every 6 inches and 2½ feet between rows. Used same as Lima beans. It has gained fame and is being planted extensively by Italian gardeners for shipping and for home use.

BEETS

DETROIT

Culture—Planting time, Southern States: Spring, January to July; Fall, September to December. Edible condition about 62 days from time of planting seed. Plant 2 ounces to 150 feet of row, 12 pounds to one acre. Sow in thick rows 12 inches apart or sow broadcast and thin to 10 inches apart.

CROSBY'S EARLY EGYPTIAN—Beets globe shaped, center of beet blood red, tender, excellent eating. Grown extensively by market gardeners in South for shipping and home use.

DETROIT DARK RED—Beets oval shaped, flesh of beet very dark red, an excellent variety for shipping and eating. A favorite of many large Southern market gardeners. Excellent for canning and shipping.

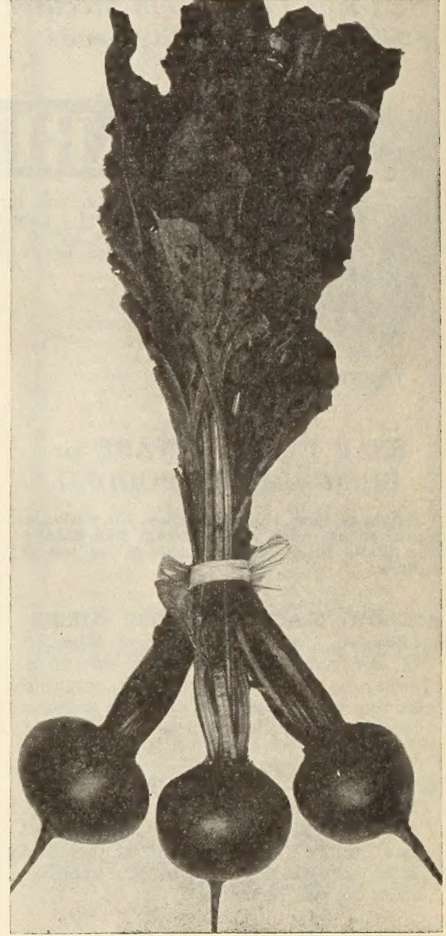

EARLY ECLIPSE—50 days. Extra early, uniform in size, deep red color, round, with small tap roots, flesh bright glossy red, crisp and tender.

WONDER BEET—One of the earliest of table beets for outside culture. Bright red skin, vermilion red flesh with distinct zones of lighter red. Of excellent quality, being sweet, tender and free from fibrous roots, good shipping and canning variety.

FIREBALL—A distinct variety, having the finest table qualities. Flesh solid, crisp, sweet and brilliant red color. Globe shape, skin smooth. Especially desirable for canning.

SWISS CHARD or PERPETUAL SPINACH BEET—Leaves much darker green than the Lucullus. As the outer leaves are cut more come up from the center. The center stems can be cooked and served like asparagus and the leaves cooked like spinach or other greens. It is undoubtedly one of the best vegetables, as this can be grown throughout the summer.

CHICAGO EARLY BLOOD TURNIP—Oval shape, dark red flesh, smooth skin, a favorite among private and market gardeners. Extensively used for canning and shipping.

SUGAR and STOCK BEETS

Culture—Planting time, Southern States: Spring, January to July; Fall, September to December. Sow 5 pounds to one acre in rows 2 to 3 feet apart. When 4 or 5 inches high thin to 12 to 15 inches apart in rows. Ready for harvest about 75 days after planting seed.

LONG RED MANGEL—Flesh white with reddish tinge. Heavy yields, 18 to 24 inches long, about 6 inches in diameter. We recommend this as the best variety of stock Beet.

KLEIN WANZLEBEN—75 days. Exceedingly valuable for stock feeding. Roots 12 to 15 inches; white with tinge of gray, very rich in sugar content, easily grown. Should be left in ground until frost to secure the largest crop.

BROCCOLI

BROCCOLI

Culture—Planting time, Southern States: Spring, January to June; Fall, September to December. Plant 1½ ounces to 150 feet of row. Plant and cultivate same as Cauliflower.

GREEN CALABRESE—A distinct variety grown by Italian gardeners for Italian trade only. Forms large solid heads which remain green. After this is cut a number of sprouts develop from the leaf-axis, each sprout terminating in a small head about one inch in diameter. Bunched and sold as second crop. Sow seed in frames early in spring and market in June and July. Also planted in September for Christmas marketing. Pkg. 10c; oz. 40c; ¼ lb. \$1.00; lb. \$3.00; 5 lbs. \$13.25, postpaid.

DE CICCO—An extremely early variety, producing large heads, light green in color and very productive. Pkg. 10c; oz. 40c; ¼ lb. \$1.30; lb. \$4.00.

CARROTS

Culture—Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 1½ ounces to 150 feet of row, 4 pounds to one acre. Sow fairly thick in rows 15 to 18 inches apart and thin to 3 or 4 inches apart in rows, when two inches high. Approximate number of days to edible condition is given after name of varieties.

DANVERS HALF LONG—65 days. A half long orange carrot, grown extensively in all classes of soil, desirable and suitable for field culture. Mature roots are of medium length, six to eight inches long, tapering uniformly to a blunt point. Flesh is orange color, very tender and of excellent quality. Favorite for the South for shipping and home use.

EARLY HALF LONG CHANTENAY—85 days. An excellent medium early, half long variety. One of the best for marketing and home use, very productive and desirable. Roots are thick, 5½ to 6 inches in length, uniformly half long or stump rooted but tapering slightly, smooth orange-red color. Flesh very crisp and tender. Extensively used for bunching.

IMPERATOR—77 days. Long, slightly tapering roots, just enough top to bunch well. Deep solid orange all through. Prolific, brittle, tender and sweet.

IMPROVED LONG ORANGE—80 days. Intermediate to late maturing, desirable for table use as well as stock feeding, very productive, uniform in shape. Roots are tender and of good quality.

LARGE WHITE BELGIAN—100 days. Creamy white with light green crown about 7 to 9 inches in length. Used extensively for stock feeding.

OXHEART or GUERANDE—65 days. Excellent variety for hard, stiff soil. Tops are comparatively small, mature roots are 4½ to 5 inches long, very thick. Flesh is bright orange finely grained and sweet.

CHERVIL (Curled)

Culture—Sow broadcast during fall and winter for spring and in January and February for summer.

Used a great deal for seasoning, especially in oyster soup and is often cut between lettuce. A favorite in the South. Pkg. 10c; oz. 40c; ¼ lb. 75c.

CHIVES or SCHNITTLAUCH

One of the finest and most delicate of entire onion family. Tops are used for seasoning salads, cream cheese, etc. Plant from December to April. Pkg. 25c.

COLLARDS

Culture—Planting time, Southern States: Spring, June to September; Fall, October to January. Plant two ounces to 150 feet of row. Belongs to cabbage family and is cultivated in same manner. Edible condition about 85 days. One ounce will produce about 2,500 plants.

GEORGIA—About 85 days. An oldtime favorite, stands all sorts of conditions without injury.

CABBAGE—Cross between the Georgia Collard and the Charleston Wakefield Cabbage. Bred for hardness of the Collard and the flavor of cabbage. Tender, does not grow as tall as the Georgia Collard and does not winterkill.

LOUISIANA SWEET—Developed by Dr. Julian C. Miller of the Louisiana Agricultural Experiment Station, inbred to produce a uniform type of plant, having a deep compact rosette center, leaves with short stems and free of purple or red color.

VATES—Large, low growing broad and spreading variety. Stands cold weather. Color from glossy green to grayish green.

CAULIFLOWER

Culture—Planting time, Southern States: Spring, January to March in hotbeds, in open ground to June; Fall, September to December. Plant one-fourth ounce to 150 feet of row. Transplant 1½ feet apart in rows 2½ feet apart in open ground. Approximate number of days to edible condition is given after name of each variety. This varies with climatic and soil conditions.

EARLY ITALIAN GIANT—110 days. Large white compact heads, delicious flavor. A fine variety.

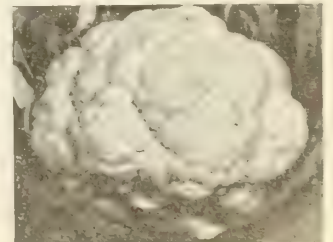

LATE ITALIAN GIANT—120 days. The largest of all Cauliflowers, very compact, grown very extensively and well liked.

EARLY SNOWBALL—75 days. Large compact heads, a very desirable and dependable head-forming Cauliflower. The most popular variety among Southern gardeners. Favorable for shipping and home use.

BRUSSELS SPROUTS

Culture—Planting time, Southern States: Spring, January to June; Fall, September to December. Plant half ounce of seed to 150 feet of row. Plant and cultivate as cabbage.

LONG ISLAND—Small cabbage-like heads of 1½ inch diameter grow at each leaf joint on stalk about 20 inches tall. Heads mature successively. Pkg. 10c; oz. 50c; ¼ lb. \$1.40; lb. \$4.50, postpaid.

EARLY SNOWBALL

CABBAGE

Culture—Planting time, Southern States: Spring, June to September; Fall, October to January. One ounce will produce about 3,000 plants, 5 ounces to the acre. Sow 5 or 6 seeds per inch in rows about 6 inches apart in well prepared beds. Cover very lightly with earth. Keep bed moist but not wet. Transplant to field when plants are 6 inches tall preferably on a cloudy day or in late afternoon. Frequent shallow cultivation for a short time is best. Distance between plants 12 to 15 inches; between rows, 24 inches. Approximate number of days to edible condition from time of planting seed is given after name of each variety. This varies with weather and soil conditions.

COPENHAGEN—75 days. Very vigorous, short stems, few outer leaves, producing a very hard round head, very uniform in size and of long keeping qualities. Very profitable, and gaining in popularity every day. Excellent for shipping and home consumption.

DISEASE RESISTANT COPENHAGEN MARKET—75 days. A "yellow" resistant strain of Copenhagen. Not so early or as uniform, but a good round head and crisp.

LARGE LATE FLAT DUTCH—75 days. Large, solid heads, sometimes weighing 15 to 25 pounds. This is the most popular winter cabbage among Southern gardeners for home consumption and shipping.

STEIN'S EARLY FLAT DUTCH—90 days. Heads flat, very large, compact, grows vigorously and has short stem. Many gardeners prefer this variety because of its excellent record of forming heads under unusual weather conditions. Good shipper.

ALL HEAD EARLY—90 days. Large flat, compact and solid heads, few outside leaves, an excellent early cabbage. A dependable sort.

CHINESE or CHIHILI—75 days. Large, crumpled light green leaves resembling Paris Cos Lettuce. Leaves are eaten boiled or raw as a salad. Popular throughout the South. Has a distinct flavor, very mild and pleasant.

DANISH BALL HEAD SHORT STEM—100 days. Very hardy, sure heading, very solid, and of good quality. One of the very best keepers and desirable for distant markets. They are exceedingly hardy in resisting cold and stand dry weather well. Medium sized heads, round and solid and stand shipment better than any other late sort.

EARLY DRUMHEAD SAVOY—85 days. Plants are vigorous, of medium size with rather short stem and very sure heading. Heads are large, nearly round, fairly solid, sweet and tender. Best for family use.

JERSEY WAKEFIELD

GLORY OF ENKHUIZEN—80 days. A sure header of matchless quality. Heads are nearly round, solid and of splendid size for an early variety. Leaves are broad and spreading and more or less curved. Has met with instant favor all over the South for marketing and home use.

MAMMOTH RED ROCK—75 days. Largest and surest heading red cabbage. Plants large and vigorous with medium length stem and spreading outer leaves which are dark green with red veining. Heads are late maturing, large, round, very solid and of very attractive deep red color. Much used for cole slaw and pickling.

EARLY JERSEY WAKEFIELD—66 days. A most excellent variety, is the earliest and surest heading of first early cabbage for the market and home garden. Most gardeners depend on it for their extra early crop. Plants hardy, resistant to cold and unfavorable conditions. Compact and erect or very slightly spreading. Stem short, heads are medium, very solid, uniformly pointed and of excellent quality.

CHARLESTON WAKEFIELD—88 days. Very solid head, but less pointed and considerably larger than the Early Jersey Wakefield. Its exceeding hardness, earliness and size of head have made it a popular sort with market gardeners and shippers. Plants are medium sized, very vigorous and slightly spreading. Heads are blunt pointed but very broad at base. Excellent for marketing and home use.

GOLDEN ACRE—65 days. Very compact, medium sized heads, uniform in size and in maturing. Very popular for shipping and home use.

WISCONSIN ALL-SEASON—90 days. Valuable in territories infested with the destructive disease known as "yellows." Heads are large and solid, weighing up to 10 pounds.

WISCONSIN HOLLANDER No. 8—100 days. Heads round, becoming slightly flattened across the top; color blue green. Heavy yielder, an ideal cabbage for storage and shipping. Highly resistant to the "yellows."

CARDOON

Culture—Sow seed in open ground in early spring in rows 3 to 4 feet apart and plants 1 to 2 feet apart in the rows. The blanched stalks and ribs will become fit for use in 3 to 4 weeks and are a fine winter vegetable. Grown in the same manner as Celery and blanched in the same manner.

CRESS

Culture—Planting time, Southern States, Spring, January to April. Fall, September to December. Broad leaf, plant 3 ounces to 150 feet of row. Water Cress—2 ounces will plant space about 9 x 9 feet in water.

BROAD LEAVED or UPLAND CRESS—This variety is extensively cultivated for market. It is sown from early Fall to late Spring. The leaves resemble Water Cress. It is a wholesome dish as a salad alone or in combination with other vegetables.

WATER CRESS—Used extensively for salad making. About 75 days to edible or marketable condition.

CORN SALAD

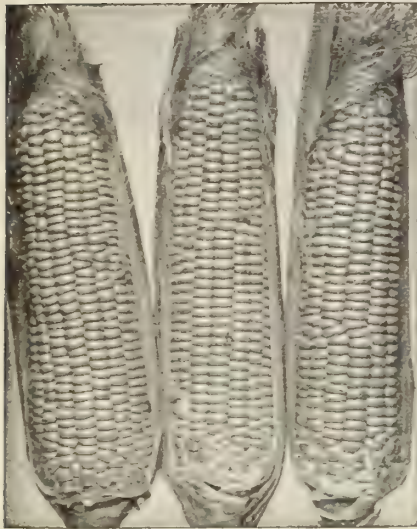

Culture—Planting time, Southern States, Spring, June to September. Fall, October to January. Plant 2 ounces to 150 feet of row. Sow thinly in drills. Leaves are used same manner as lettuce and cress.

CORN SALAD—Grown and used extensively throughout the South.

COPENHAGEN

GARDEN CORN

GOLDEN BANTAM

SUGAR CORN

ARISTOGOLD BANTAM—83 days. A true aristocrat of the sweet corn hybrids. Fast growing, makes exceptional yields even in hot, drouthy seasons, because it stands early planting in cold wet soil. Has great resistance to ear worm and smut damage. Stalks 8 to 9 ft. tall and ears extra long with 12 to 14 rows. Sweet, tender and delicious.

GOLDEN BANTAM—88 days. Most widely known early variety, grown in every section, stalks five feet in height, heavy foliage, ears 6 to 7 inches long, eight rowed, with broad kernels of a golden yellow color. Flavor distinctly different. Stools very rapidly and should be allowed to remain as the stools are productive of an ear.

COUNTRY GENTLEMAN—90 days. Stalk 6½ to 7 feet. Ears slim, about 8 inches long. Grains long and irregular, very narrow. Considered by many one of the best corns for family garden. The silk on Country Gentleman ears is always very red and it can be easily distinguished by this feature.

STOWELL'S EVERGREEN—96 days. Height of stalk about 7½ feet. Ears about 8 inches long, very white, excellent roasting ear variety. Market gardeners grow this variety more than any other.

GOLDEN CROSS BANTAM—An outstanding hybrid bred for yield and quality. Large well filled and uniform ears.

Culture—Planting time Southern States: February to July. Plant in hills 3 feet apart in rows and rows 3 feet apart, four or five seeds and thin out to 2 or 3. For the best success, seed corn should be planted within three days from time of receipt from seed house to avoid trouble from weevils. A pound will plant about 400 hills. One peck to an acre. Approximate number of days to edible condition (roasting ears) on Sweet and Sugar Corn and to maturity on Field corn is given after each variety. This varies with soil and climatic conditions. Corn is often planted some each week during planting season so that the harvest will be throughout the season.

SWEET CORN

TRUCKER'S FAVORITE—90 days. Large late corn often used for roasting ears. Ears around 11 inches long with 12 to 14 rows of broad white kernels. Stalks tall with medium foliage. One of the leaders for shipping.

IMPROVED ADAMS EARLY—Large, 68 days. Similar in type to the Adams Extra Early but larger and somewhat later although still a very early sort. Used as a table corn throughout the South for both home use and shipping; average height of stalk 4½ feet.

FIELD CORN

14 lbs., 1 peck; 56 lbs., 1 bushel

JARVIS GOLDEN PROLIFIC—Matures dry corn in 115 days or less, one of the finest early yellow corns, 14 to 18 rows to the ear, heavy yielder and prolific.

SILVER MINE

SHOE PEG WHITE—100 days. Ear is medium size and length, and has a very small rich red cob. Grains large and pointed, 18 to 20 rows to ear, well filled to the ends. Easy to shell and feeding value for stock is unsurpassed.

HASTING'S YELLOW PROLIFIC—125 days. Prolific yellow corn, 2 to 5 ears on stalk, ears about 7 inches long, deep yellow grains on small ear. Great feeding value.

HASTING'S PROLIFIC WHITE—100 days. Requires a fairly long season to develop hard corn. Stalk is large, 8 to 12 feet tall, according to soil and season. Ears of medium size, two or more to the stalk, depending on the distance given and the growing condition. Cob is small; ears are well filled out. Best corn for grain production, for roasting ears, for making meal and for stock feeding.

SHOE PEG YELLOW—100 days. Similar to above but a golden yellow grain.

IMPROVED GOLDEN DENT—High yielding yellow corn for the South. Medium early variety maturing in 110 to 115 days. Makes one to two ears, well filled out on both ends.

IMPROVED MEXICAN JUNE—125 days. A very dependable variety late in the Spring throughout the Cotton Belt. Stalks are usually short, ears 8 to 9 inches long, grains short to medium, cobs medium in size, white with a few blue grains. The best late corn for the South.

HYBRIDS

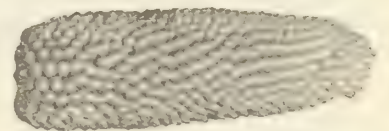

FUNK'S G-740—Yellow hybrid corn for the deep south. Gives a much larger and more dent type ear. Excellent stalk quality and high yield, one of the best for silage. Lb. 60c; 2 lbs. \$1.00; 5 lbs. \$2.15; Peck \$3.70; ½ bu. \$6.60; Bu. \$12.20—F.O.B. New Orleans.

FUNK'S G-785W—A new white prolific hybrid which gives high yields and has excellent stalk quality. Ears medium large, well covered to protect from weevils, birds and weather damage. Lb. 60c; 2 lbs. \$1.00; 5 lbs. \$2.15; Peck \$3.70; ½ bu. \$6.60; Bu. \$12.20—F.O.B. New Orleans.

FUNK'S G-50—Quick maturing and high yield make it possible to put hogs in the cornfield early. Produces large ears with medium soft grain and light shuck. Lb. 60c; 2 lbs. \$1.00; 5 lbs. \$2.15; Peck \$3.70; ½ bu. \$6.60; Bu. \$12.20 — F.O.B. New Orleans.

POP CORN

SOUTH AMERICAN or DYNAMITE—Vigorous grower, deep orange kernels, smooth and round, which pop double the size of others. Yellow, crisp and tender, no hard centers.

== CELERY ==

Culture—Planting time, Southern States: For bleaching celery, June to August; for seasoning purposes, any month. Plant 1½ ounces to 150 feet of row. Sow seed in a bed, cover with canvas to protect from heat. Transplant to large bed when about 3 inches high, to rows 3 feet apart, plants 8 inches apart. When about matured earth is brought up around the plants or boards are placed on both side of rows for proper bleaching. Approximate time of maturity is given after each variety. This varies with climatic conditions and soil.

GOLDEN SELF-BLANCHING

GOLDEN PLUME CELERY—Early, delicious and self-blanching. Early maturing, large and vigorous grower, easy to cultivate, very attractive and when matured is most inviting. Foliage creamy yellow and stalks creamy white, brittle, tender and well flavored, profitable for marketing and home use. Extra fine strain.

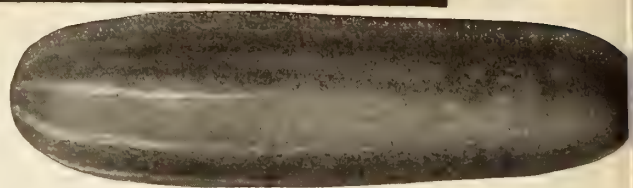

GOLDEN SELF-BLANCHING — 118 days. Solid, very tender, golden yellow color, brittle with delicious flavor. We cannot recommend this variety too highly.

CELERIAC TURNIP ROOTED—135 days. Forms a turnip-shaped root which is used extensively for soup, sliced and cooked, or salad.

CUBIT

== CUCUMBERS ==

Culture — Planting time, Southern States, Spring, February to July; Fall, August to September. Plant five ounces to 150 feet of row, 4 pounds to acre. Sow in hills 3 to 4 feet apart. Each hill should be fertilized heavily with rich decomposed manure or other suitable fertilizer. Plant about 8 to 10 seeds to each hill. Approximate number of days to edible condition given after each variety.

A & C—60 days. Fine dark green variety. Disease resistant vines which produce an abundant crop of uniform cucumbers, fully 10 inches long and straight.

CUBIT—A dark green, white spine, averaging 9 inches in length. Ideal for slicing and shipping with firm white flesh.

ASHLEY—66 days. Vigorous vines and very productive. Fruits dark green, long and taper to the stem end.

F-1 HYBRID SUPERSLICER—Long, slender, and dark green fruits, cylindrical and heavy producer.

MARKETER—70 days. Noted for uniformity, deep green in color, has become the leading early shipper. Fruits medium dark green, slightly tapered to both ends.

IMPROVED LONG GREEN—70 days. Very dark green, length about 12 inches, one of the best and largest cucumbers on the market, none better. Excellent for table and shipping.

JAPANESE CLIMBING—60 days. Strong, vigorous vines can be grown on trellis. Cucumbers round, about 10 inches long, thick. Grown extensively for shipping and table.

WEST INDIA GHERKIN—(For Pickles) 60 days. Very small, oval fruits, prickly sort, very distinct from all others and grown exclusively for pickles. Fruits should be picked when young and tender. Seed is distinctly smaller than that of other cucumbers and requires from two to three weeks to germinate.

STAYSGREEN—60 days. The greenest of the Long White Spine varieties. Hardy, large fruited, of excellent shape and uniform. A favorite among market gardeners. Used extensively for shipping.

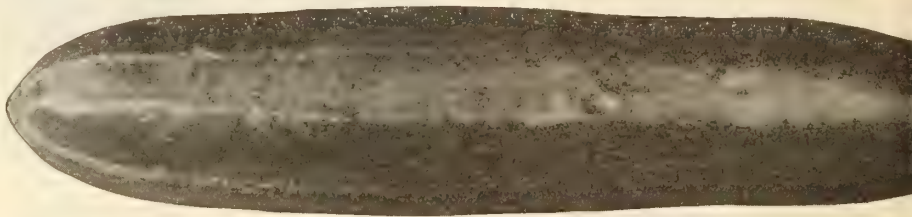

PALOMAR—64 days. Early and very productive. Fruit is even deep green about 8 inches long, does extremely well in the South. A new outstanding Downy Mildew Resistant Cucumber.

PALMETTO—67 days. Resistant to downy mildew; fruits are very dark green in color and taper slightly at both ends; white spines, an important variety for fall planting in the South.

SNOW'S or HEINZ PICKLING—52 days. An early maturing, small dark green cucumber, round square ended, grown largely for pickling. A very fine variety.

HOTKAPS

Individual hothouse for plants. See page 40 for prices.

EGG PLANT

Culture — Planting time, Southern States: Spring, January to March, in hotbeds; in open ground, April to June. Fall, September to October. Plant one ounce of seed to 150 feet of row. Approximate time to edible condition is given after name of each variety; this varies, due to climatic and soil conditions. Half pound of seed will furnish plants for one acre.

NEW ORLEANS MARKET or LARGE PURPLE—90 days. This is the variety mainly grown here, oval in shape and of a dark purple color and very productive. Southern grown seed of this, as of a good many tropical or sub-tropical vegetables, is preferable to Northern seed, as it will germinate more readily and the plant will last longer during the hot season. Best variety for shipping and home use.

FORT MYERS MARKET—85 days. Vigorous and productive high bush, nearly egg shaped, ideal size for shipping. Deep purplish black color.

MISSION BELL HYBRID—70 days. Heavy yielder, deep oval in shape, tapering towards stem, dark and smooth.

BLACK BEAUTY—85 days. Rich, shiny purplish black color, heavy producing plants, hardy, grown very extensively by small and large gardeners.

FLORIDA HIGH BUSH—60 days. Very large, dark rich purple fruits of excellent quality. Produces 6 to 8 fruits. Growing in popularity every year.

FENNEL

(Italian or Florence, Imported)

Culture—Planting time, Southern States: Spring, March to June; Fall, August to November. Plant 1 1/4 ounces to 150 feet of row. Sow in rich well prepared soil in drills 2 feet apart and cover 1/4 to 1/2 inch with earth. When plants are 2 inches high, thin to 10 inches apart in row. Blanch the stems. Used extensively by Italians of New Orleans and vicinity and for shipping to Eastern markets. Used very much the same as celery.

GARLIC (Sets)

Culture—Planting time, Southern States: Spring, January to June; Fall, September to November. Plant one pound to 150 feet of row, 300 pounds per acre. Plant 6 inches apart and about one inch deep in row 2 to 3 feet apart. Used very extensively throughout the South for flavoring stews, roasts and various other dishes. About 90 days to edible condition.

FORT MYERS MARKET

ENDIVE

Culture—Planting time, Southern States: Spring, February to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to the acre. Sow either broadcast and transplant like lettuce or in rows one foot apart and thinned to 8 inches apart. Used for salads. Approximate time to edible condition of the two varieties is 75 days. Bleached by tying up leaves or covering plants.

FULL HEART BATAVIAN—90 days. An improved variety with large leaves, broader and thicker and earlier in maturity than any other variety. Plants are upright growing, compact heart that blanches easily.

ITALIAN RED RIBBED (Panacaller) — Hardy, vigorous growing endive with bright, deep green leaves, the mid-ribs of the outer leaves are usually tinged with rose. The dense mass of deeply divided leaves formed the center blanches readily to rich cream color.

GOURDS

All at 20c per packet, postpaid.

Culture — Planting time, Southern States: Spring, March to June; grown very easily, makes ornamental vines, usually grown on trellis or fence. Do not plant near pumpkins or squash as their taste will be affected.

DISHCLOTH—When fully ripe the skin can be easily removed and the sponge-like interior cleaned and dried, then used as dish rag.

DIPPER—Long handled gourd, dippers are made from this variety.

ITALIAN or SWEET GOURD (Cucuzzi Caravazzi)—Used same as squash or pumpkin, grows to length of 24 to 36 inches, resembles a bat, blunt at one end and tapering to the other end. One of the finest vegetables extensively used by Louisiana gardeners, principally by the Italian element.

NEST EGG—Resembling a hen's egg in color, form and size, does not crack and is uninjured by cold or wet weather, used as a nest egg and for darning purposes.

CASABANANA—Wax Gourd. A strong growing vine with long shaped, dark crimson fruit, which looks very ornamental. It is used for preserves. March to May. None

ORNAMENTAL—Planted for ornamental vines, produces a variety of small colored gourds.

HERBS

Aromatic Medicinal and Pot. Planted in Early Spring.

ANISE—An annual, cultivated for its seeds and its leaves which leave a fragrant agreeable scent and a pleasant taste. Pkt. 15c.

BORAGE—Splendid leaves for flavoring. Pkt. 15c.

CARAWAY (Kuemmel)—The seeds are useful for flavoring. Pkt. 15c.

CORIANDER—Annual, its tender leaves are usually used for soups and salads. Pkt. 15c.

DILL—Annual, it is cultivated for its seeds, which are used for medicinal purposes and for flavoring pickles. Pkt. 15c.

FENNEL—Perennial, tea is made from the seed and is an excellent remedy for colic and stomach complaints. Pkt. 15c.

MARJORAM—Biennial, the leaves are used in soups, the seeds in the manufacture of sausage, an aromatic of sweet flavor. Pkt. 15c.

ROSEMARY—Seasoning (aromatic leaves). Pkt. 15c.

RUE—For medicinal purposes; good for all fowls also. Pkt. 15c.

SUMMER SAVORY—Flavoring. Pkt. 15c.

SAGE—Perennial, tea made from these leaves is an excellent means of producing perspiration. Pkt. 20c.

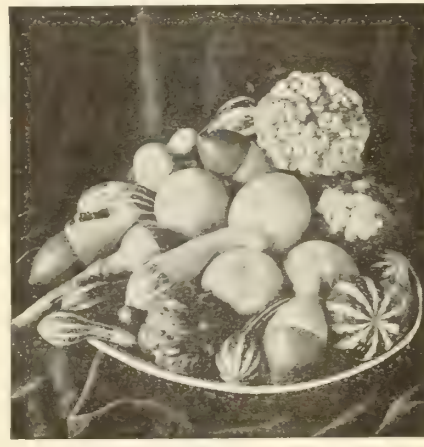

SWEET BASIL—Annual, the leaves are used for highly seasoned dishes as well as in soups, stews and sauces. Pkt. 20c.

THYME—Perennial, Thyme tea is an excellent remedy for nervous headaches. Pkt. 20c.

HORSERADISH (Roots)

Culture — Planting time, Southern States: Spring, January to April. Set out roots in rich, moist, well prepared ground in rows 2 1/2 feet apart, set roots vertical, small end down, top of root 1 to 2 inches below surface. Cultivate thoroughly until tops cover ground.

Dozen 85c; 100 \$3.85, postpaid. Not postpaid, \$25.00 per 1,000.

LETTUCE

Culture — Planting time, Southern States: Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to one acre. If planted during hot weather, soak seeds for 2 hours in water, preferably on ice if convenient, and wrap in damp cloth. Keep for six days in damp cloth until sprouted, then plant. Ants very often carry away the seed before sprouting but this treatment stops it. Approximate time to maturity is given after each variety. This varies with soil and climatic conditions.

FLORIDA ICEBERG—83 days. Very popular variety. Crisp heading plants of medium size; leaves smooth, thick, medium light green. Heads round and well folded.

GREAT LAKES—An outstanding new Lettuce of Iceberg type. Stands the heat and sun and is unusually slow to go to seed. One of the best.

BIG BOSTON—75 days. Extra large, round, very firm, light green heads. Majority of market gardeners in South are growing this variety for shipment and table use.

NEW YORK WONDERFUL—80 days. Crisp, large heads, dark green colored leaves. Produces most compact heads. Excellent for shipping.

GRAND RAPIDS—65 days. Non-heading, leaves crisp, light green, curled, fringed. Delightful flavor.

ICEBERG—84 days. Heading, curled, medium size, crisp, green, fringed leaves enclosing crisp, white interior. A very popular variety.

BIBB—57 days. Distinct butter head type, dark green variety, forming a rather loosely folded head of small size.

ROMAINE or PARIS WHITE COS—70 days. Loose spoon shaped leaves, loose heads. Bleached by tying up leaves. Delightful tasting, an excellent variety.

CHICKEN LETTUCE — For chickens or rabbit feeding, very productive, when cut, starts right in to grow again. This variety of lettuce does not head but sends up stalks 3 to 4 feet high. Heavily leaved which can be pulled off like Kale.

KOHL-RABI

Culture — Planting time, Spring, January to April; Fall, September to December. One ounce will produce about 3000 plants. Sow in light, rich soil in rows 1 1/2 feet apart, then thin to about 6 inches apart in rows. 1 1/4 pounds to the acre.

WHITE VIENNA — 65 days. The bulb-shaped root is used similar to turnip and the leaves similar to cabbage.

ICEBERG

SIBERIAN KALE or BORECOLE

Culture — Planting time, Southern States: Spring, March to September; Fall, October to January. One ounce will produce about 3,000 plants. Grown both for a forage crop as well as for table use as greens. Sow and cultivate same as Cabbage, to which family Kale belongs.

SIBERIAN KALE—80 days.

MUSTARD

Culture — Planting time, Southern States: Fall, September to December; Spring, January to June. Plant 2 ounces of seed to 150 feet of row, 2 pounds to one acre. Sow either by broadcast or in rows about one foot apart. Approximate time to edible condition of all varieties, 50 days.

FLORIDA BROAD LEAF—This is a quick growing and very productive variety which remains in condition for use a long time. The leaves are rounded, very slightly crumpled, unfripled and very large. They are medium light green with a broad pale green midrib.

CHINESE BROAD LEAF

CHINESE BROAD LEAVED — Large, dark green, smooth leaves sometimes 2 to 3 feet high and one foot wide; excellent variety.

SOUTHERN CURLED—Pale green, large curled leaves, scalloped edges, the most extensively grown variety. Highly recommended for shipping.

TENDERGREEN—Can be sown nearly every month in the year in the South. Easy to grow and ready for market in 25 to 30 days. Requires 3 to 5 pounds to the acre and planted in rows 2 to 3 feet apart. Withstands the extreme summer heat and is resistant to cold weather. Leaves are large, oblong and dark green in color with small center rib. Cooked same as Spinach, Turnip or Mustard Greens.

LEEK

Culture—Planting time, Spring, January to June; Fall, September to November. Plant 4 ounces to 150 feet of row. Also sow broadcast and then transplant 6 inches apart in rows about 12 inches apart, 4 lbs. to the acre. Belongs to the onion family and is used for flavoring stews and soups.

LARGE LONDON FLAG—60 days. Well known broad leaved leek, hardy, productive and good quality, and extensively cultivated in this country.

WATERMELON

HALE'S BEST

MUSKMELON

or CANTALOUPE

Culture — Planting time, Southern States: Spring, February to June. Plant in rich, sandy loam soil. Mix well rotted manure or any good fertilizer in each hill. Plant 14 to 12 seeds in each hill. Hills 5 feet apart each way. When plants are nicely started thin to about 4 plants to each hill. Two ounces required to 160 feet of row. Four pounds to an acre. Approximate time to maturity is given after each variety. This varies with climatic and soil conditions.

EARLY HACKENSACK—70 days. Flesh and skin greenish color, large size, ribbed, excellent tasting. Popular throughout the South.

HONEY DEW—100 days. Same as the Golden Honey Dew except it has emerald green flesh. Has honey-like flavor, in great demand wherever grown.

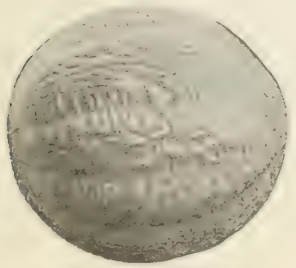

HONEY ROCK—90 days. Very prolific, heavier, coarser netting than Honey Ball. Almost round, medium size, rich salmon flesh of fine quality. Outstanding for home use and earliness and a good market variety.

MILWAUKEE MARKET (orange flesh)—94 days. A splendid size, sometimes averaging 20 to 25 pounds, possesses a very delicious flavor. A very prolific variety and splendid for shipping.

TEXAS RESISTANT NO. 1—90 days. Resistant to Downy mildew and aphids. Fruits fairly uniform, about 6 inches long. Rind firm and fine texture, flavor sweet and spicy.

POLLOCK'S 10-25—This excellent main crop melon of the Rocky Ford type is one of the most popular of shipping varieties. Fruits nearly round or slightly oval, show no ribbing and are densely netted over the entire surface. Flesh is rich salmon at center, shading to light green at rind. Seed cavity is very small.

ROCKY FORD or HART'S VICTOR—74 days. Small size, prolific producer; green flesh, a favorite in the South. Good shipper.

ROCKY FORD OR HART'S VICTOR

Culture — Planting time, Southern States: Spring, February to June. Plant in light sandy soil, mix well rotted manure or any good fertilizer in each hill before planting. Plant 8 to 12 seeds in each hill about 7 feet apart each way; 2 ounces to 150 feet of row and 4 pounds to one acre. When plants are 3 inches high, thin to about 3 to 4 plants per hill. Approximate time to maturity given after each variety. This varies with climatic and soil conditions.

DIXIE QUEEN—90 days. A white seeded variety, round and finely flavored, sweet and juicy, firm flesh which seems to be all heart because of the very small seeds. A good shipper due to having a tough rind.

FLORIDA GIANT—95 days. Vigorous growing and heavy producers. Melons are nearly round in form, skin solid dark green, flesh red and firm. A good shipper. Grows larger than most any other variety, not unusual for specimens to weigh 100 pounds.

SELECTED TOM WATSON—85 days. 18 to 24 inches long, compact, deep red flesh, free from core, special selected seed of the Tom Watson variety.

CONGO

RATTLESNAKE (Georgia)—85 days. Light green color, lightly mottled and striped, flesh scarlet, thin rind, excellent shipper, very popular.

SUGAR BABY—92 days. Another "icebox" melon, sugary red flesh, very prolific.

GOLDEN HONEY—Bright golden flesh extending close to dark green ring. Meat firm and sugary flavor. No hard core or stringy sections.

CHARLESTON GRAY—85 days. Excellent for home and market. Fruits long and blocky with light gray green color. Rind hard; deep pink and delicious meat. Shows no hollow heart. Seeds large, dark veined brown.

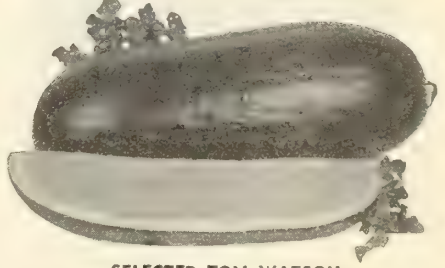

MIDGET MELON

STONE MOUNTAIN — 80 days. Almost round, rich dark green. Flesh is rich scarlet, fine grained and especially sweet. Seeds white. Under favorable conditions weigh 50 to 65 pounds.

CONGO—90 days. Bred for resistance to anthracnose, but not immune. Tough rind and firm, fine grained flesh, especially adapted to Southern shipping. Fruits are oblong, blocky, dark green faintly striped with a lighter green.

PRESERVING CITRON—90 days. Small round, light and dark green striped. Used only for sweet pickling and preserving, grown extensively.

OKRA = PARSNIP = ONIONS = PARSLEY =

OKRA

Culture — Planting time, Southern States: Spring, March to June; Fall, July to October. Sow in rows about 2 feet apart and after plants are nicely started thin to 8 to 10 inches apart in row. 10 ounces will plant 150 feet of row, 20 pounds to one acre. The famous soup called "Gumbo" made in the South is prepared with Okra; also makes a delicious salad. Approximate number of days to edible condition is given after each variety. This varies with climatic conditions and soil.

LOUISIANA MARKET — 60 days. Starts bearing when plant is very small, heavy producer, one of the most popular varieties, planted extensively. Cannot be recommended too highly.

DWARF GREEN PROLIFIC—60 days. Dwarf plant, but a very heavy bearer. Very prolific. We recommend this variety very highly.

LOUISIANA GREEN VELVET—60 days. Uniform pods about 6 to 7 inches long and tender. Spineless characteristics of this variety make it exceedingly desirable.

PERKINS' MAMMOTH LONG POD—70 days. Long green pods, round near the end and tender, the most popular variety grown.

WHITE VELVET (Lady Finger)—60 days. Medium size round white pods, prolific producer. A favorite variety for canning.

LOUISIANA GREEN VELVET

ONION SETS

Onion sets are largely for planting home gardens for early greens and also for market. Plant in rich, well cultivated ground in rows 10 to 12 inches apart, and 2 inches apart in the row, 8 bushels to the acre. Plant for Spring from January until April; Fall, September to November.

RED WETHERSFIELD—Very hardy, good keepers, one of the best all purpose red onions.

YELLOW DANVERS—Make medium sized, globe-shaped, yellow onions, very fine.

WHITE SILVERSKIN—Very attractive onion, makes large silvery onions.

PARSNIPS

Culture — Planting time, Southern States, Spring, January to April; Fall, September to November. Two ounces will plant 150 feet of row, 8 pounds to the acre. Sow in deep, mellow soil in rows 12 to 18 inches apart. When plants are 3 inches high, thin to 3 inches apart in the row.

HOLLOW CROWN OR SUGAR

RED WETHERSFIELD

ONIONS

Culture — Planting time, Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to one acre. Onions grow best in rich, loamy soils. When young plants are about the size of a goose quill, transplant to open ground 4 inches apart and 12 to 18 inches between rows. Cultivate sufficiently to keep out weeds. Approximate number of days from time of planting is given after each variety. This varies with climatic and soil conditions.

RED CREOLE—130 days. Very large, semi-globe shaped, reddish colored bulb, excellent tasting, good keeper and heavy producer. This variety constitutes one of the important crops in Louisiana.

YELLOW BERMUDA—120 days. Large flat yellowish colored onion, very popular for market as well as home garden. Grown extensively throughout the South.

CRYSTAL WAX BERMUDA—120 days. Large flat, pure white onion, mild and delicious flavor, one of the finest and most popular varieties.

DANVER'S YELLOW GLOBE—130 days. Large globe shaped, brownish yellow bulbs, grown extensively for sets, an excellent variety.

EVERGREEN BUNCHING (White)—60 days. Produces a cluster of 4 to 6 shoots from a single seed the first season. Used only for green onions.

RIVERSIDE SWEET SPANISH (Yellow)—Large yellow variety of Spanish origin, similar to Prizetaker, but larger. Globular, with golden yellow skin, flesh white, very mild and of pleasing flavor. Prolific and desirable for shipping and storage.

SILVERSKIN (White)—A most widely used white onion, excellent for sets, as a pickler, for green bunching and storage. Medium sized, thick, flat, clear white, hard and fine grained, of pleasing flavor.

PARSLEY

Culture — Planting time, Southern States: Spring, January to April; Fall, September to November. 150 feet of row. Plant in rich, mellow soil. Parsley seed starts growth slowly. We suggest soaking seed in water for 10 to 12 hours before planting. Sow thickly in rows 1 foot apart; when about 3 or 4 inches high, thin to 5 or 6 inches apart. Number of days to edible condition given after each variety.

PLAIN LEAVED—75 days. Dark green foliage, very hardy, strong flavor. A favorite for Southern tables.

DOUBLE CURLED—90 days. Leaves curled and crimped, grown very extensively for market.

HAMBURG OR ROOTED — Forms thick, fleshy edible roots that are used for flavoring.

YELLOW BERMUDA

Not Postpaid 10 lbs. \$ 7.50

Not Postpaid 10 lbs. \$17.50

GARDEN PEAS == POTATOES ==

SMOOTH VARIETIES

15 lbs., 1 peck; 60 lbs., 1 bushel

CREOLE PEAS—60

days. This variety will withstand severe heat and cold. Pods are 3 to 3½ inches long, with 5 to 7 peas of a distinct flavor. Its vigorous vines average 5 to 7 feet and yield an enormous crop. Immune to root rot, mildew and such diseases. Sow during winter and early spring.

CREOLE

PEDIGREED EXTRA EARLY — 60 days.

Height of vine 2½ feet, pods 3 inches, a prolific producer. One of our best and most popular varieties. Seed small, smooth, yellowish white. Stock we offer is much superior to most on the market and recommended highly.

EARLY ALASKA—60 days. Vines 2½ feet tall; pods 3 inches, prolific producer, an extra fine variety.

ATLAS FERTILIZER EMULSION

A complete liquid organic Plant food—derived from Fish.

Pint \$1.20; Quart \$2.15, postpaid; Gallon \$6.25.

Directions for use on package.

Culture—Planting time, Southern States: Spring, January to April; Fall (small seed potatoes), August and September. Potatoes thrive best in a light, dry, rich soil. For spring planting, large potatoes are cut so that a good sized piece will contain 3 eyes. The pieces are planted in rows 2 to 3 feet apart and hills 1 to 2 feet apart in rows. Fall seed potatoes are small and are planted whole, all varieties listed mature in about 85 to 100 days.

Dust plants with Arsenate of Lead, powdered form, every two weeks after plants are 6 inches high for control of Potato Bugs.

EARLY BLISS RED TRIUMPHS—Certified selected stock. Light red, medium size, round, uniform shape, eyes slightly depressed, an excellent variety for shipping. Grown very extensively both for home and market.

WHITE ROSE—Long tubers almost uniform in shape and size. Flesh white. It is a heavy cropper and planted extensively in the South.

KATAHDIN—Slightly oval white, very smooth with shallow eyes. Vines are light green and vigorous and so far no mosaic has been found on this variety. It is unsurpassed for cooking and eating. Katahdin does well on rich peat soils and on muck land.

LASODA—Adapted to heavy soils and produces higher yields than the Bliss Triumphs. Plant grows upright, is of fair vigor and small to medium leaves. Potatoes are semi-round to oblong, smooth, and pinkish red in color.

OIL-I-CIDE

The ideal oil spray emulsion for orange and other citrus groves and similar orchard trees, Azaleas, Camellias, Gardenias, and other cultivated shrubs.

Pint 90c; Quarts \$1.50; Postpaid. Gal. \$2.80, not postpaid.

Culture — Planting time, Southern States: Spring, January to May; Fall, August to November. Plant 3 pounds to 150 feet of row, 1½ to 2 bushels to one acre. Sow in rows 2 to 3 feet apart and cover 2 inches.

LITTLE MARVEL

Distance in rows and between rows is governed by the height of the different varieties. Approximate number of days to edible condition is given after each variety; this varies with climatic and soil conditions.

WRINKLED VARIETIES

14 lbs., 1 peck; 56 lbs., 1 bushel

LITTLE MARVEL—62 days. Dwarf variety, about 18 inches high. Valuable for home and early shipping. Vines dark green, medium stocky. Pods single and double dark green, blunt, plump, well filled with 7 or 8 tender peas. Seeds medium size, light green, squarish, wrinkled.

CARTER'S IMPROVED TELEPHONE — 70 days. Pods 4½ inches long; height of vine 4 feet, an excellent producer.

THOS. LAXTON—64 days. Height of vine 3 feet, pods 4 inches long. Market gardeners are growing this variety very extensively.

DIAZINON 25E—(25% Emulsifiable Solution). Widely used to control ants, roaches, fleas, ticks and many household insects. Pt. \$3.50.

TALL TELEPHONE

CALIFORNIA WONDER

PEPPERS

PEPPERS

Culture—Planting time, Southern States: Spring, December to March in hotbeds; in open ground, March to June; Fall, August to November, in open ground. Two ounces will produce about 1500 plants, 6 ounces to one acre. Open ground planting 1½ feet apart and 1½ to 2 feet between rows. Do not plant two varieties close together as they mix easily. Production of peppers in the South is one of our large industries. Approximate time to edible condition is given after each variety. This varies with climatic and soil conditions.

SWEET PEPPERS

- CALIFORNIA WONDER**—75 days. Large bright red glossy type, similar in shape to crimson Giant but far superior, of mild delicate sweet flavor, early and unsurpassed for shipping, a heavy yielder.
- LIBERTY BELL**—75 days. Similar to California Wonder but borne pendently, less infolding at nose, dark green in color.
- YOLO WONDER**—78 days. Very good for shipping and market gardens, large dense foliage and a week later than California Wonder. Thick flesh, pendent fruits.
- FLORIDA GIANT**—75 days. Fast becoming a favorite of Louisiana truckers. Prolific bearer, large, dark green color and smooth.
- PERFECTION or PIMENTO**—Thick fleshed. Mild and sweet, smooth glossy green turning bright red.
- OAKVIEW WONDER**—63 days. Fruits blocky, smooth, thick mild sweet flesh. Plant stockier than California Wonder but fruit are set earlier and more abundant.

HOT PEPPERS

LONG RED CAYENNE — 110 days. Pods 4 inches long, twisted and pointed. Very pungent, bush about 3 feet tall, a favorite with many Southern gardeners.

TABASCO — 75 days. Small pointed red peppers, bush 3 feet high. Prolific producer, very hot. The nationally known Tabasco Sauce is made from this excellent variety.

LONG RED CAYENNE

RADISHES

Culture — Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 3 ounces to 150 feet of row, 8 pounds to the acre, about 10 inches apart and cover lightly. If too thick radishes do not form properly but crowd each other. Plants should be about 2½ inches apart, allowing proper space for development of Radish. Radishes constitute a very large crop for Northern markets. Approximate time to edible condition is given after each variety. This varies due to climatic and soil conditions.

CINCINNATI MARKET—28 days. Popular for home and market use. Tops short and small, roots are 6 to 7 inches long, cylindrical and tapered near tip, deep red with purplish tinge. Flesh white and crisp.

SPARKLER TURNIP WHITE TIP—20 days. One of our best early radishes for the home garden and a great favorite in large markets for early planting outdoors. Roots are nearly round, slightly flattened on the underside. Color is very bright, deep rose scarlet with a distant white tip. Flesh is white and of the best quality.

CRIMSON GIANT TURNIP RADISH—25 days. Very large, round, scarlet color, good shipper, grown very extensively and very popular.

ICICLE

SCARLET TURNIP

FRENCH BREAKFAST—22 days. About 1½ inches long and about ¾ inch in diameter, deep scarlet color, except a little white around root. We recommend this variety very highly.

BRIGHTEST SCARLET or THREE-QUARTER LONG—25 days. Bright scarlet color, average 6 inches long, a favorite.

EARLY DEEP SCARLET TURNIP—22 days. Small, round, deep scarlet color, mild taste. You will like it.

ICICLE—25 days. About 5 inches long, white brittle and has mild flavor, well liked.

BLACK SPANISH (Winter)—60 days. Outside color black, flesh white, 8 inches long. Planted very extensively for winter production.

SCARLET GLOBE RADISH—23 days. Tops small, ideal for bunching. Globe shaped about 1¼ in. long, good red color, white flesh and crisp.

RHUBARB

or PIE PLANT ROOTS

Culture — Planting time, Southern States: November to February. Plant roots 2 feet apart each way. Mix plenty of well rotted manure in each hill. Used extensively for pies and sauce. Delicious flavor.

RHUBARB or PIE PLANT ROOTS—Seed. Pkt. 10c; oz. 25c; ¼ lb. 75c, postpaid. Rhubarb Roots, 35c ea.; \$3.50 doz., postpaid.

= PUMPKINS =

GREEN STRIPED CASHAW

= SPINACH =

Culture — Planting time, Southern States: Spring, January to June; Fall (main crop), September to December. Plant 3 ounces to 150 feet of row, 10 pounds per acre. Sown broadcast in fields or in rows about 12 inches apart (small gardens). There are no better greens produced than Spinach. Rich, moist ground is best and grows better when season has cool nights. Approximate time to edible condition is given after each variety. This varies with climatic conditions and soil.

BROAD LEAVED FLANDERS — 70 days. Very large, broad leaves, grows erect, very extensively grown, fine flavor.

EXTRA LARGE LEAVED SAVOY — 60 days. Very large, thick leaves, slightly curled. The best and most extensively grown variety for market.

OLD DOMINION—40 days. A savory leaved Spinach, compact dark bluish green, heavily crumpled except at the very leaf tip. Blight resistant, withstands heat and cold. Highly recommended.

NEW ZEALAND — 90 days. Dark green, thick succulent leaves. Heat resistant, grows well all summer, very popular.

NOBEL GIANT LEAVED — The best smooth leaved sort. Produces a large mass of very thick rounded leaves of enormous size, a quick grower and stands very long before bolting. "Nobel" is an ideal variety for truckers and canners.

VIROFLAY—Desirable for canning as leaves grow clean and upright, and are broad and pointed at end.

= SQUASH =

Culture — Planting time, Southern States: Spring, March to July; Fall, August to November. Plant 1½ ounces to 150 feet of row, 4 pounds per acre. Prepare hills by mixing well rotted manure in each hill and pulverizing thoroughly. Plant 6 to 8 seeds in each hill. Summer varieties, hills should be 3 to 4 feet apart each way, winter varieties 6 to 8 feet. When well started thin to 3 plants to each hill. Do not bruise when gathering. The approximate number of days to edible condition is given after each variety. This varies, due to climatic and soil conditions.

EARLY WHITE BUSH or PATTY PAN—54 days. Vine dwarf in habit, produce round scalloped squash 4 inches thick and about 9 inches in diameter. The most popular variety in the South.

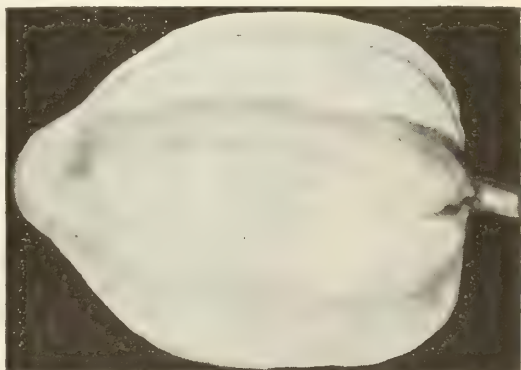

COCOZELLE or ITALIAN GREEN STRIPED—90 days. Fruit somewhat shaped like a Banana Cantaloupe, 12 to 15 inches long and about 5 inches thick. When young, dark green, afterwards light yellow. Excellent for slicing and drying like eggplant.

GIANT SUMMER STRAIGHTNECK — 55 days. An improvement on the Crookneck variety. Fruits are thick, heavily warted, straight and bright orange yellow color. Highly recommended.

LONG YELLOW or SUMMER CROOKNECK—80 days. Produces crooked shaped yellow squash. Thick, fine quality flesh. Very popular.

ZUCCHINI—60 days. An increasingly popular sort of the Italian Marrow group. Fruits weigh 3 to 4 pounds, nearly cylindrical, and straight. Color medium green, mottled with creamy-grey and lighter green stripes. Flesh firm and delicately flavored.

TABLE QUEEN (Acorn)—65 days. Small acorn shaped, dark green, early maturing squash. Produces uniform thin shelled fruit, flesh rich orange color, delicious flavor, good keeper.

GOLDEN MAMMOTH

TOMATOES

Culture—Planting time, Southern States: Spring, December to March, in hotbed; in open ground to June. Fall, September to November in open ground. Plant 1/2 ounce to 150 feet of row. One ounce will produce about 3000 plants. Transplant from hotbed when plants are 6 inches high to open ground, 3 to 4 feet apart each way. Tomatoes require rich, well pulverized soil. If danger of frost is not over when transplanted, plants must be covered at night whenever there is danger of frost. To protect them from insects dust with Arsenate of Lead, powdered form, about 2 weeks after transplanting and at 2-week intervals thereafter. Approximate number of days from time of planting seed to edible condition is given after each variety. This varies due to climatic and soil conditions.

PONDEROSA—125 days. Very large, very firm, crimson color, few seeds, prolific producer, one of our best varieties.

LOUISIANA ALL SEASON—80 days. A cross between Louisiana Pink and Break-O-Day. Produces a heavy early yield of uniform sized fruits. Globe shaped and medium in size.

OXHEART—The home gardener who delights in introducing unusually good things into his neighborhood will be amply repaid by including Oxheart in his garden plans this spring. Among large fruited tomatoes this variety is unique. In form it is distinct, since it is almost exactly the shape of a heart as the name implies, and single fruits sometimes weigh more than two pounds.

BREAK O' DAY—One of the wilt-resistant varieties. An early tomato resembling Marglobe but of higher scarlet color and not so distinctly globe shaped. It is slightly earlier than our stocks of Marglobe. The vines are vigorous and productive. Planted extensively in trucking districts and gives excellent results.

BRIMMER—90 days. A pink fruited variety; similar to Ponderosa. Fruits large, flat and rough small seed cells, of inviting flavor.

CERTIFIED MARGLOBE—79 days. Plants vigorous with heavy foliage, resistant to wilt and rust; moderately productive. Fruits medium large, globular, smooth, solid with thick walls and cross sections, a fine variety.

DWARF CHAMPION (Tree Tomato)—Dwarf and compact growing plants, stems thick and short. Extremely hardy and can be set out very early. Purplish pink color, medium quality and excellent variety.

GROTHEN'S GLOBE—70 days. A new early maturing wilt resistant variety. Fruits deep scarlet and free from objectionable yellow about the stem end.

LOUISIANA DIXIE—74 days. Originally bred from Louisiana Pink. Resistant to wilt and early blight. Fruits are medium to large in size and globe shaped. Fruit is a very good pink color, does not crack, prolific producer.

LOUISIANA GULF STATES—77 days. A highly refined variety of the ordinary Gulf States Market. Vigorous growing, high in yield, and will resist wilt. Color is a good pink, globe shaped and resistant to cracking.

LOUISIANA PINK—Same as Louisiana Red, except in color.

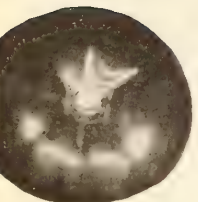

LOUISIANA RED—Wilt resistant tomato, medium size, small seed cavity, heavy bearer, fruits borne in large clusters and almost globe shaped.

RUTGERS—77 days. Extensively planted for shipping purposes. Large, uniform, purplish pink variety, globe shaped and free from cracks and blemishes. Firm skin, smooth and solid with few seeds. This variety is resistant to blight and matures uniformly.

PEAR-SHAPED YELLOW—Similar to Red Pear-Shaped except in color.

RED PEAR-SHAPED—100 days. Pear shaped, small size fruits, good quality.

RED CHERRY—72 days. Small round fruit in clusters, deep red.

RUTGERS

"NO-SEED" BLOSSOM-SET

"No-Seed Blossom Set" is a popular liquid hormone spray for Tomatoes, Strawberries, Cucumbers and other crops. Makes Tomatoes ripen 1 to 3 weeks earlier, stopping blossom drop.

4 oz. \$0.75 each; 1 pint \$1.75 each.
12 oz. Aerosol (for 100 plants) \$1.79 each.

ROQUETTE or Rocket Salad

Culture — Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 1 1/2 ounces to 150 feet of row. Sow 15 inches each way. Leaves are used for salad similar to lettuce. Ready for cutting about 45 days. Very delicious.

ROQUETTE or ROCKET SALAD—Pkt. 20c; oz. 65c; 1/4 lb. \$1.75; lb. \$6.00, postpaid.

SALSIFY or OYSTER PLANT

Culture — Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 2 1/2 ounces to 150 feet of row, 8 pounds per acre. Spade ground deeply and mix with well pulverized manure. Sow in rows 10 inches apart. Grown in both large and small Southern gardens. Edible condition 150 days after planting. Taste similar to oysters.

SANDWICH ISLAND—Pkt. 10c; oz. 50c; 1/4 lb. \$1.35; lb. \$4.00, postpaid.

SORREL (Broadleaved)

Culture — Planting time, Southern States: Spring, January to April; Fall, September to December. Plant 2 1/2 ounces to 150 feet of row. Sow in rows one foot apart. Used like Spinach as well as in salad and in soup. Edible condition about 85 days after planting. Planted in many small gardens throughout the South.

SORREL (Broadleaved)—Pkt. 25c; oz. 75c; 1/4 lb. \$2.25; lb. \$4.50, postpaid.

ACME TOMATO DUST

Many common spraying and dusting materials are irritating to tomato plants, causing rapid respiration so that they lose moisture more quickly than the plant can replace. Acme Tomato Dust is especially formulated for tomatoes, controlling blights and worms and permitting best possible harvest.

1 lb. 95c; 4 lb. bag \$2.15.

PURPLE TOP WHITE GLOBE

TURNIPS

Culture—Planted August to November. For home consumption and Northern markets. Plant 1½ ounces to 150 foot rows, 4 pounds to one acre. Sow broadcast, or in rows 1½ to 2 feet apart. Cover a half-inch. Thin out as overcrowding hinders proper development. Turnips grow better in a light, rich soil. Turnips and Rutabagas are also used extensively for feeding stock; however, do not feed them to milch cows as it affects the taste of the milk. The approximate number of days to maturity is given after each variety. This varies with climatic and soil conditions.

EARLY PURPLE TOP STRAP-LEAVED—50 days. Medium size, flat grained and tender, an excellent variety.

PURPLE TOP WHITE GLOBE—60 days. Large globe shape white turnip with purple top. One of our best and most popular varieties.

SHOGAIN—70 days. Large white, semi-flat, heavy producer, good keeper, used both for table and stock. Louse and disease resistant.

WHITE FLAT DUTCH—46 days. An early variety, excellent for home and market gardeners. Tops small, strap leaved. Roots flat, white throughout, fine grained, sweet and tender.

SEVEN TOP—70 days. Tops very large and make excellent greens and salads. Very hardy roots, excellent for the South.

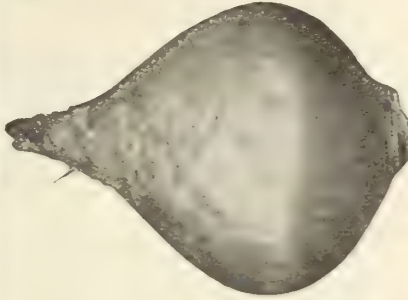

EARLY PURPLE TOP STRAP-LEAVED

RUTABAGA

Culture—Same as for Turnips.

IMPROVED PURPLE TOP RUTABAGAS—80 days. Oblong shape, yellow flesh, very solid, used extensively for table and stock feeding.

IMPROVED PURPLE TOP RUTABAGA

VEGETABLE PEAR CHAYOTE or MERLITON

Culture — Planting time, Southern States: Spring, March to May. The Vegetable Pear makes an excellent dish whether creamed, fried, stuffed, baked with cheese or as a salad. It is grown on a long ornamental vine similar to the gourd, to which family it belongs. The vine is usually trailed on a trellis or fence. Plant the whole pear with broad end down, leaving small end slightly exposed. Never plant less than two for successful results of production.

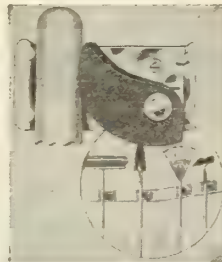

VEGETABLE PEAR (Chayote or Merliton)— Each 45c; dozen \$4.50, postpaid.

WHITE SHALLOTS

Culture — Planted August to March. For home consumption and Northern markets. 6 bushels per acre in 4 foot rows. The quantity to be expected from an acre, if planted in field culture, 4 foot rows, would be from 50 to 60 barrels; but if planted, as is done near New Orleans, in 2 foot rows, 100 to 125 barrels if planted in August and September. If planted later, they do not multiply so well.

WHITE SHALLOTS— Sold out.

AUTOMATIC HANDLE HOLDER

For all Household and Garden Tools—to hold all handles from ¾" to 1¼" in diameter. Price 40c.

CEL-U-MULCH

with GROLIUM

LOOSENS CLAY SOILS—by breathing in air as heavy clay soils take moisture from the thousands of tiny sponge-like organic particles, thus aerating heavy soils.

STABILIZES SANDY SOILS—by retaining moisture, thus retarding the leaching out of soluble plant nutrients.

EASIEST OF ALL MULCHES TO USE! Just pour CEL-U-MULCH out of the bag and spread to desired depth. No shredding, no fluffing, no breaking up required.

ONE 50 POUND BAG OF CEL-U-MULCH WILL ABSORB AND RETAIN MORE THAN 10 GALLONS OF WATER, AND WILL RETARD ITS EVAPORATION!

50 lb. bags, \$2.85, F.O.B. New Orleans.

VEGETABLE PLANTS

Home Grown

Ready October 15 to February 15

Early Flat Dutch Cabbage Plants.
\$1.25 per 100; \$6.00 per 1,000, postpaid.

Onion.
Sold out.

Cauliflower Plants.
35c per doz.; 1.50 per 100, postpaid.

Artichoke Plants.
\$1.65 per doz., postpaid.

The following ready from March 15 to May 15:

Eggplant, Pepper and Tomato Plants.
35c per doz.; \$1.75 per 100; \$7.50 per 1,000, postpaid.

(Due to conditions of delay in transit, transportation of all plants sent at purchaser's risk.)

SOY BEANS

VELVET and SOYBEANS for Fertilizer

Planting Time, Southern States, March to August

BILOXI (Soy)—Bush grows upright 5½ feet with very heavy foliage. Besides producing excellent food for grazing and hogging down with corn for ensilage, it is one of the best fertilizing plants in existence. We recommend this variety very highly. 6 to 8 pounds will plant one acre in rows 3 feet apart. 1 to 2 inches deep. 60 lbs. per bu.

1 lb. 50c; 2 lbs. 80c; 5 lbs. \$1.50, postpaid.

EXTRA EARLY SPECKLED VELVET or 90 Day—Produces very long vines and very heavy foliage. Heavy producer of short, well filled pods. No better soil fertilizer plant can be found. This variety is known and recognized as the best for all purposes. Plant 1 peck to 1 acre in rows 4 to 5 feet apart. 60 lbs. per bushel.

1 lb. 65c; 2 lbs. \$1.20; 5 lbs. \$2.50, postpaid.

MAMMOTH YELLOW (Soy)—Vines bushy, vigorous, erect habit. Sow broadcast a half bushel to one acre or 1½ feet apart in rows 3½ feet apart. An excellent and popular variety. 60 lbs. per bushel.

1 lb. 50c; 2 lbs. 80c; 5 lbs. \$1.50, postpaid.

OTOOTAN (Soy)—A very fast growing plant, growing 4 to 5 feet high, fine stems and delicate leaves. Cures quickly, makes hay of finest texture and very fine quality. It leads the field for silage or forage. Jet black, rather small, a half peck plants an acre, 2½ to 3 feet between the rows. Extensively used throughout the South. 60 lbs. to the bushel.

1 lb. 60c; 2 lbs. \$1.00; 5 lbs. \$2.00, postpaid.

AVOYELLES—Developed in Louisiana, grows very similar to Otootan, sometimes called Improved Otootan, seed are much larger—the worms past year in Louisiana did no damage to Avoyelles but ruined the Otootans.

1 lb. 55c; 2 lbs. 95c; 5 lbs. \$1.75, postpaid.

DWARF ESSEX RAPE

DWARF ESSEX RAPE—For Spring, Fall or Winter planting for quick green forage or grazing for hogs and poultry, there is nothing equal. Can also be used on the table as a substitute for "turnip greens." Tops look like Rutabagas and growth is similar yet larger. Rape makes no bulbous roots. Can be planted in rows like turnips, 20 pounds per acre, or broadcast, 8 to 10 pounds per acre.

1 lb. 50c; 5 lbs. \$2.00, postpaid.

JAPANESE BUCKWHEAT

Culture—Plant in the Spring or Fall, matures in 8 to 10 weeks. Sow one bushel to the acre. Steckler's Japanese Buckwheat grown for poultry feed; when in bloom excellent for honey bees; early cultivated and generally grown.

1 lb. 50c; 2 lbs. 90c; 5 lbs. \$1.75, postpaid.

CHUFAS or EARTH ALMONDS

Culture—Plant from March to June in rows 2 to 3 feet apart. Forms an abundance of small tubers on the roots. One of the best feeds for hogs and poultry; easily harvested. One peck will plant one acre.

1 lb. 70c; 2 lbs. \$1.20; 5 lbs. \$2.40, postpaid.

CASTOR BEANS

Culture—Plant in 5 foot elevated rows, 6 feet between the rows and 8 feet in the row, cultivated the same as you would any ordinary field crop. Requires 5 pounds to plant an acre.

ORDINARY CASTOR BEANS—The variety used for oil extraction.

Pkt. 15c; 1 lb. \$4.00, postpaid.

COTTON SELECTED VARIETIES

Planting time, March and April. One bushel is required to plant one acre. Thoroughly break and prepare the ground early. Rows should be 3½ to 4 feet apart and hills 12 to 14 inches apart in the row. When the cotton comes up it should be off-bared deep while it is small in order to let the heat of the sun strike the beds. As the plants get larger, shallow down and towards the last, cultivate very shallow. Always keep the top crust of the ground broken in dry weather, as it prevents it from losing its form. Never stop plowing for wet weather until the ground turns in slices then quit immediately until it dries off. Never lay by until the middle of August. The first week in April has been found to be the best time for planting cotton.

Note—All of our Cotton Seed is free from Boll Weevil. These are all good varieties which have been thoroughly tested and recommended by Agricultural Colleges and Experiment Stations of the Southern States.

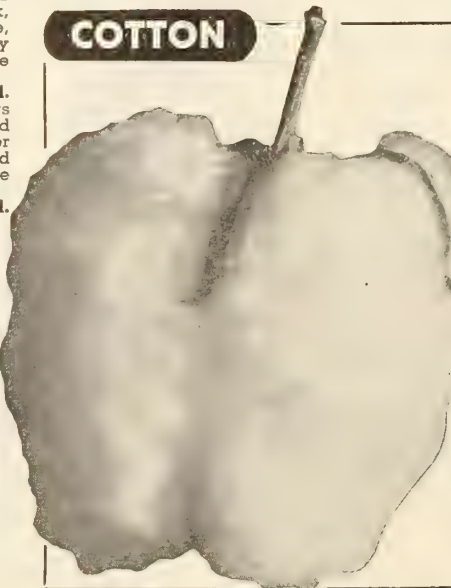

DELTA AND PINELAND No. 15—A widely known upland variety. Big boll, early, productive, extremely wilt and disease resistant. 1 to 1/32 inch staples. Write for Prices.

STONEVILLE 2-B—Long staple Cotton, extremely early, high producing big boll Cotton. 1¼ to 1½ inch staple. Superior to most big balled short cottons in picking qualities.

Write for Prices.

2% CERESAN. A dust disinfectant for Cotton, Flax, Millets, Peas, Sorghums and Narcissus. Use 2 or 3 oz. per bushel of seeds. 1½ lbs. \$2.30, postpaid.

COTTON

COW or FIELD PEAS

Planting Time, Southern States, March to August

BRABHAM—Grows upright, very heavy producer, retains foliage very well while being cured. Very vigorous growing. An excellent variety, very popular. 60 lbs. per bushel, 2 bu. per acre. ¼ lb. 25c; 1 lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.35, postpaid.

CLAY—Produces heavy foliage as well as pods. Very vigorous growing. The Clay is the most popular field pea in the South. Excellent forage crop. 60 lbs. to bushel. ¼ lb. 25c; 1 lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.35, postpaid.

WHIPPOORWILL—Upright, bushy growth of plant. A great favorite because of early maturity and is easily harvested. 60 lbs. per bushel. ¼ lb. 25c; 1 lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.35, postpaid.

MIXED PEAS—Often thousands of bushels of field peas become mixed and often farmers request a mixture of good varieties. These mixtures are becoming very popular. 60 lbs. per bushel. ¼ lb. 25c; 1 lb. 60c; 2 lbs. \$1.00; 5 lbs. \$2.25, postpaid.

PURPLE HULL—Distinct from other varieties. Pods are tinged a dark purple red, longer and shell easily. Productive and disease resistant. ¼ lb. 30c; 1 lb. 80c; 2 lbs. \$1.35; 5 lbs. \$2.45, postpaid.

COWPEAS

PEAS for Table Use

SUGAR CROWDER—Very prolific producer, upright growing, bush form. This variety planted extensively for table use. Very popular. 60 lbs. per bushel. 2 bushels per acre. ¼ lb. 30c; 1 lb. 80c; 2 lbs. \$1.40; 5 lbs. \$2.55, postpaid.

LADY—Small round, pure white pea. Generally planted between corn and used extensively for the table. 60 lbs. per bushel. ¼ lb. 30c; 1 lb. 80c; 2 lbs. \$1.40; 5 lbs. \$3.00, postpaid.

RAMSHORN BLACK EYE—Large vines, excellent for forage crop, popular for the table. 60 lbs. per bushel. ¼ lb. 25c; 1 lb. 65c; 2 lbs. \$1.20; 5 lbs. \$2.25, postpaid.

BLUE GOOSE—Known also as the Taylor. A large, early, speckled Pea with long pods. Fine for table. A splendid soil-improver and stock feed. ¼ lb. 30c; 1 lb. 80c; 2 lbs. \$1.40; 5 lbs. \$2.55, postpaid. Write for larger quantity prices.

SORGHUM

SORGHUM

EARLY AMBER SORGHUM—Exceedingly popular for forage, relished greatly by stock because of sweetness. Makes good syrup but not quite as good for syrup as the Orange because of the small stalk. Plant March to July in rows 3 feet, 12½ pounds per acre, 6 to 10 seeds, 12 to 18 inches apart in rows. If sown broadcast, half bushel per acre.
1 lb. 45c; 5 lbs. \$1.80, postpaid. Write for quantity prices.

EARLY ORANGE SORGHUM—Equally as valuable as the Amber for forage but on account of the longer growth it is better for syrup making. About ten days later than the Amber. Planting and culture same as Amber.
1 lb. 45c; 5 lbs. \$1.80, postpaid. Write for quantity prices.

CERTIFIED SART—Considered a good syrup maker and highly recommended for silage. Grows about 12 feet tall, stalks erect, is resistant to fungus diseases and leaf disease.
Lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.35, postpaid.

MILLETS

GERMAN MILLET—This is the favorite variety. Heavy producer of excellent hay. Sow April to June, 50 lbs. per acre. Cut when in bloom, recommended for this climate.
1 lb. 55c; 5 lbs. \$1.80, postpaid. Write for quantity prices.

PEARL or CATTAL MILLET—Especially valuable in the South; an enormous cropper. Used for green feed only.
1 lb. 55c; 5 lbs. \$1.80, postpaid. Write for quantity prices.

SAGRAIN

SAGRAIN—A comparatively new grain and is claimed to be one of the finest of the sorghums for forage and ensilage, as it is quite sweet and grows an abundance of broad long leaves. It is a wonderful grain to stool out, makes fine heads of large, light brown grain which is excellent for stock and poultry feeding. Drill at the rate of 12 pounds per acre.
1 lb. 50c; 5 lbs. \$1.75, postpaid.

Especially Adaptable to the South FODDER and GRAIN CROPS

FETERITA—This is 10 to 15 days earlier than Kaffir Corn, makes good fodder, and makes an excellent yield of grain without having received any rain from the day it was planted until it was harvested. 15 pounds per acre. Planted from March to May.
1 lb. 45c; 5 lbs. \$1.50, postpaid. Write for quantity prices.

MILO MAIZE (Yellow)—Splendid non-saccharine sorghum for feed crop. Planted in rows 4 to 5 feet apart, sow 10 lbs. per acre from March to August.
1 lb. 45c; 5 lbs. \$1.50, postpaid. Write for quantity prices.

KAFFIR CORN—Makes excellent fodder, keeps green and brittle. For grain, sow 10 lbs. per acre in rows 3 feet apart. For fodder, sow ½ to 1 bushel either broadcast or in drills. Planted March to June.
1 lb. 45c; 5 lbs. \$1.50, postpaid. Write for quantity prices.

HEGARI—Earlier than Kaffir corn or Feterita, dwarf in growth with large heads of white grain, stands dry weather well. Plant 8 to 10 pounds per acre in drills.
1 lb. 50c; 5 lbs. \$1.50, postpaid.

EVERGREEN BROOM CORN—One acre will produce 500 lbs. of brush and nearly 40 bushels of seed which is used for feed. Plant and cultivate similar to corn. Sow March and April in rows 3½ feet apart, plant 6 inches apart in rows. Requires 20 pounds per acre. We recommend planting of more Broom Corn.
1 lb. 70c; 5 lbs. \$2.75, postpaid. Write for quantity prices.

EGYPTIAN WHEAT (Shallu)—Properly belongs to the non-saccharine sorghums, excellent for food for poultry and all stock on the farm. Threshed as wheat or other grain. Planted in Spring and early Summer. Sow 20 pounds per acre from February to July.
1 lb. 60c; 5 lbs. \$1.95, postpaid. Write for quantity prices.

SUNFLOWER

MAMMOTH RUSSIAN—Heads often measure from 12 to 15 inches in diameter containing an immense amount of seed, which is used for poultry feed, planted in Spring, 3 pounds per acre.
Pkt. 10c; 1 lb. 60c; 5 lbs. \$2.85, postpaid. Write for quantity prices.

LADINO CLOVER

Low acreage cost because so little required per acre. Sow 1 to 2 lbs. with other clovers or grasses. If sown alone and thick stand wanted first season use 3 to 4 lbs. Do not plant deep, not over ¼ inch.

Excellent for pasture and hay. Quick recovery after grazing. Soil builder, furnishes nitrogen to land.

Price: Lb. \$1.45; 5 lbs. \$6.00.

OATS

RED RUSTPROOF OATS (Reclaimed)—This is an excellent variety, very popular throughout the South and Southwest. Produces large heavy heads, full of excellent quality oats.

Price: Peck 80c; Bu. \$2.60. F.O.B. New Orleans.

PEANUTS

Culture—Planting time, Southern States: April to August. Plant two bushels per acre, in rows 2½ to 3 feet apart in hills 12 to 15 inches apart in the rows. Cultivate well and keep free from weeds.

IMPROVED WHITE VIRGINIA—Grows upright and produces heavy crop of large peanuts.
1 lb. 70c, postpaid. Not postpaid, 5 lb. lots \$2.70.

TENNESSEE RED—Very large shells, usually contains 3 large kernels, enormously productive.
1 lb. 70c, postpaid. Not prepaid, 5 lb. lots \$2.50.

WHITE SPANISH—Small pods, very prolific. The whole plant is harvested and used for stock feeding, very nutritious.

1 lb. 70c, postpaid. Not prepaid, 5 lb. lots \$2.70.

Write for prices on larger quantities.

WHEAT

Culture—Best time to plant in South: October 15 to December 15. Seed should be drilled in rather than broadcast. In early planting (to November 15), use 1 bushel per acre, later planting use more.

ATLAS 66—Many planters claim that this variety is earlier than Fultz. Beardless, excellent producer, recommended highly.

1 lb. 45c; 2 lbs. 80c, postpaid.

FIELD RYE

ABRUZZI—This variety holds the reputation of yielding 10 to 15 bushels more per acre than other varieties. Plant 1½ bushels per acre from September to December.

1 lb. 40c; 5 lbs. \$1.50, postpaid.

PEANUTS

HARDY GRASSES FOR HEALTHY PROFIT

We have the finest and best assortment of field and lawn grass seeds offered in the South. These selected varieties are grown for us by the best growers in the United States. Our 100 years of experience is behind our selection of seeds and growers.

SUDAN GRASS

BERMUDA GRASS—Plant from February to September, 20 pounds per acre for lawns and 30 pounds for golf courses and 40 for levee protection. Bermuda is used more extensively than any other grass on lawns, golf courses and levee protection. It has a narrow, thin leaf of dark green color. Spreads quite rapidly and grows very well in the South. It dies down with a heavy frost in the Fall but comes in in the Spring. It does not do well in the shade but is very hardy where it has sunshine. Takes about 30 days to start.
1 lb. \$1.10; 5 lbs. \$3.60, postpaid.

CARPET GRASS—Plant from February to September, 20 lbs. per acre for lawn and 30 lbs. for golf courses. This is a much coarser grass than Bermuda but will stand drought and hot weather better and also stays green longer in the fall. It is a natural perennial in Louisiana. It is used extensively in lawns, golf courses, fairways and parks. It stands more shade than Bermuda. Takes about 30 days to start. Carpet Grass is also used extensively for meadows and pastures in the South.
1 lb. \$1.00; 5 lbs. \$3.90, postpaid.

CENTPEDE GRASS—Low growing, thrives in shade or sun, requires little mowing, grows in rich or poor soil and requires very little fertilization. Finer in texture than St. Augustine.
¼ lb. \$4.00; ½ lb. \$8.00; lb. \$14.95.

HULLED BERMUDA — Germinates within 15 days with proper moisture conditions. Highest grade of Bermuda with hulls removed, which insure quick results and nice green lawns. Sow 1 to 2 lbs. to each 1,000 square feet.
1 lb. \$1.25; 5 lbs. \$5.00, postpaid.

DOMESTIC ITALIAN RYE GRASS—Grown in the United States from the imported Italian and English. Used extensively today in America for lawns, golf courses, meadows and pastures and is claimed to be harder than the imported varieties. Slightly darker and stays green longer in the early summer. Requires 300 pounds to the acre on lawns and golf courses and 40 to 50 pounds for pastures.
1 lb. 45c; 5 lbs. \$1.75, postpaid. Not pre-paid, 10 lbs. \$1.40; 100 lbs. \$11.00.

SWEET SUDAN—An excellent forage crop. Grows vigorously and hardy. Yields more tonnage per acre than any other forage crop. Plant 15 pounds per acre. March and April for Spring; August and September for Fall.
1 lb. 50c; 5 lbs. \$1.90, postpaid.

ZOYSIA JAPONICA—This fine-leaved lawn grass will thrive well both in full sun and dense shade. As it only grows from 3 to 4 inches tall it requires very little mowing. The new strain we are offering grows as rapidly as St. Augustine Grass in warm weather, is immune to chinch bugs and has a tendency to crowd out crab grass. Full directions for planting with each purchase.
Lb. \$4.95, postpaid.

KOBE LESPEDEZA

Kobe has certainly earned a home for itself on Southern farms, particularly where long periods of drought occurred, for Kobe came through these droughts where Common Lespedeza was burned out. The drought resistance is a life-saver to a farmer, and is no doubt due to the very extensive root system and its rank growth, with larger than ordinary leaves. We have seen Kobe 36 inches tall but usually it is 2 to 2½ feet tall. We have seen yields of 4 tons per acre with Kobe. It is excellent for hay and pasture alike. Can be sown with oats, also with orchard grass and red top or herd's grass.
1 lb. 60c; 5 lbs. \$2.50, postpaid.

CLOVER

ALYCE CLOVER—This new clover should be on every farm in the South. Grows tall, furnishes much more hay or pasture of finer quality feeding value. Planted spring and early summer at the rate of 10 to 12 lbs. per acre.
1 lb. 55c; 5 lbs. \$1.80, postpaid.

CRIMSON CLOVER—Sow in Spring or Fall, 15 pounds to the acre. This variety is most universally grown throughout the country. On fertile soil and especially where hay is desired, it has only one superior, and that is alfalfa.
1 lb. 85c; 5 lbs. \$3.10, postpaid. Write for quantity prices.

WHITE BLOSSOM SWEET (Melilotus Alba or Bokhara)—Sow 20 pounds per acre from February to April for Spring and September to December for Fall. Resembles Alfalfa in appearance and will grow luxuriantly on soils rich in lime and of insufficient depth for successful growing of either alfalfa or Red Clover.
1 lb. 65c; 5 lbs. \$2.75, postpaid. Write for quantity prices.

WHITE DUTCH—This is a very common variety in the South, although small for hay production, it is one of our best pasture clovers. Sow in Spring or Fall, 12 pounds per acre.
1 lb. \$1.85; 5 lbs. \$8.00, postpaid. Write for quantity prices.

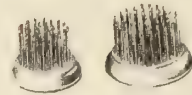

WHITE CLOVER

VOGUE PIN TYPE FLOWER

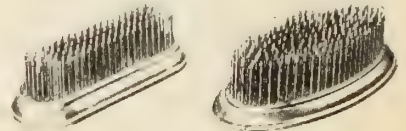

HOLDERS

TOP QUALITY FIELD SEEDS

ALFALFA

HAIRY PERUVIAN ALFALFA — Sow 30 pounds per acre, from January to April for Spring and September to November for Fall. Withstands colder weather better than Alfalfa or Lucerne and usually produces a heavier yield of hay. A perennial plant. We highly recommend this variety for hay and pasture.

Lb. 85c; 5 lbs. \$3.25, postpaid.

ANNUAL YELLOW BLOSSOM SWEET CLOVER—Also spoken of as "Sour Clover." A valuable winter legume for the lower South. Grows 2 to 3 feet tall and produces 5 to 10 tons of green matter by early May. Will reseed itself if cut when seeds start maturing. It thrives on all kinds of soil and grows rapidly and abundantly. Sow during the early fall or spring at the rate of 20 pounds per acre if used alone. Inoculate seed for best results with NITRAGIN.

SOLD OUT

BAHIA GRASS—Pensacola. This grass is as good as any if grazed while young or kept heavily grazed. Stands more cold and dry weather than any other summer grasses. Will thrive on any kind of land. Narrow leaf, having a heavy deep fibrous root system. Sow 10 to 20 pounds per acre.

Lb. 85c; 5 lbs. \$3.00, postpaid.

THE CYCLONE SEED SOWER

Saves Labor **BROADCASTS EVENLY**
Saves Seed \$5.95 each, postpaid

Uneven seeding is wasteful. The

CYCLONE will sow many acres per hour, any amount per acre. Does the work quickly.

HAIRY, WINTER or SAND VETCH

Culture—Plant from August to November or early Spring with small amount of Rye, Oats, Wheat or Barley. Sow 40 lbs. per acre. Makes an excellent hay crop and is very popular throughout the South. A good soil improver.

STECKLER'S HAIRY, WINTER or SAND VETCH.
Price: Lb. 45c; 5 lbs. \$1.60, postpaid.

VETCH

COMMON VETCH—Prefers sandy loam, well drained, but will produce a good crop on most any other soil where water does not stand. Requires 30 to 40 pounds per acre. Seed should be inoculated with Nitragin.

Lb. 45c; 5 lbs. \$1.50, postpaid.

ARASAN

Seed treated with Arasan is protected against many seeding diseases and seed decay which cause missing hills and hills with only one stalk. Fifty-one farm demonstrations in the Corn Belt showed that Arasan increased stands by 5% to 15%.

1 oz. can 75c.

CROTALARIA SPECTABILIS

World's Best Cover Crop. Build up your soil with this new legume. This new legume produces more humus and more nitrogen per acre than any other crop. It is not a pest and can be easily eradicated and reseeds itself each year under favorable conditions. It is used as a summer cover crop and soil builder in groves, orchards, vineyards, etc. Livestock will not eat it, therefore you will not be tempted to cut it for hay when your ground needs it so badly. This should be planted as soon as danger of frost is past and at a time when there is plenty of moisture in the soil, and can be planted as late as July, either broadcast or drilled. Ten pounds of seed is required per acre for broadcasting and half of that amount if drilled. Grows from 5 to 10 feet depending entirely on the locality.

1 lb. 75c; 5 lbs. \$2.85, postpaid. Write for quantity prices.

Surround Yourself with Beauty

Enjoy the beauty of lovely flowers and at the same time get that relaxation of mind and body that working in a flower garden gives you. It's an easy way to keep up your morale and get away a little while each day from the cares of a troubled world. Try it! You'll be glad that you did.

Plan your Flower Garden to give you colorful, fragrant blooms the full length of the season. Planting early and later varieties in the same area will help accomplish this. Have some Annuals and some Perennials. If you have been missing the pleasure of Flower gardening, start this Spring. It's lot of fun!

All flower seeds in packages mailed postpaid.

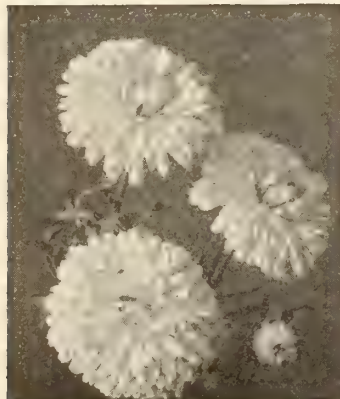

AGERATUM, MIDGET BLUE

ALYSSUM, ROYAL CARPET

AMARANTHUS

CALENDULA, CHRYSANTHA

AGERATUM (Midget Blue)—Only 3 to 4 inches tall, with a good spread of about 12 inches, freely producing tiny tufts of true ageratum-blue flowers. A decidedly compact dwarf variety, valuable for edging, rockeries and pots. Pkt. 25c; ¼ oz. \$1.00.

ALTHEA ROSEA (Hollyhock)—October until April. Very hardy. 4 to 6 feet high. Pkt. 15c; oz. \$1.25.

ALYSSUM (Little Gem, Sweet Alyssum)—Free flowering; six inches high; white flowers; very fragrant. October till April. Pkt. 15c; oz. \$1.10, postpaid.

ALYSSUM (Violet Queen)—A distinct variety, with delicate lavender flowers. Pkt. 20c; ½ oz. 80c.

ALYSSUM (Royal Carpet)—New rich violet purple compact and spreading. Pkt. 25c; ¼ oz. 75c.

ALYSSUM (Saxatile Compactum) (Gold Dust)—Golden yellow, grows to about 12 inches. Pkt. 20c; ¼ oz. 65c.

AMARANTHUS TRICOLOR (Joseph's Coat)—Very showy; cultivated on account of its leaves, which are green, yellow and red. Two to three feet high. April till August. Pkt. 15c; ½ oz. 80c.

AMARANTHUS (Molten Fire)—Dwarf leaves dark bronze, red center, very beautiful. Pkt. 15c; ½ oz. \$1.25.

AQUILEGIA (Columbine)—Long-spurred hybrids mixed. Prefer partly shaded location. Sow during January to March. Height 2½ feet. Pkt. 35c.

ARCTOTIS (African Daisy)—A very fine annual. Its flowers are large and showy, being pure white on the upper surface, the reverse of petals pale lilac blue. It can be started in hotbeds or in the open ground and will come in bloom in early July. Pkt. 25c; oz. \$1.50.

ARMERIA (Thrift, Sea Pink)—Dwarf-growing perennial with grassy leaves and a tufted habit of growth. The flowers are borne in globular heads during March to May, and the plants are suitable for edging to borders. Pkt. 25c.

ASTER (Semple's Branching Mixed)—Beautiful for cut flowers. Two feet. December till March. Pkt. 20c; oz. \$1.65.

ASTER (Queen Margaret, German Quilled Mixed)—Perfect double quilled flower, of all shades. One and a half feet high. December till March. Pkt. 20c; oz. \$1.65.

ASTER (Crego Wilt Resistant Mixed)—Large double peony shaped flowers of fine mixed colors, one of the best varieties. Two feet high, sow from December till March. Pkt. 20c; oz. \$1.65.

BALSAMINA CAMELIA FLORA ALBA—Pure white flowers about 2 feet high, used for bouquets. Sow all Balsaminas from February till August. Pkt. 25c.

BALSAMINA—Mixed. Improved camellia-flowered. Very double and beautiful colors. February to August. Pkt. 15c; ½ oz. 80c; oz. \$1.40.

BELLS OF IRELAND (Irish Green Bell flowers). Graceful 2 ft. branching stems are so surrounded by 2 in. flowers there is little room for leaves. The bell shaped calyx of the flower is green and delicately veined containing the white corolla. Both curious and beautiful. Planted January to May. Pkt. 25c; ½ oz. 60c.

BELLIS PERENNIS (English Daisy)—Finest double mixed variety; 4 inches high. October till January. Pkt. 25c; ½ oz. \$1.75.

CALENDULA (Ball's Gold)—It has fine stems, immense double flowers of brilliant glisteny orange. A great favorite. Planted October to March. Grows 1½ feet high. Pkt. 15c; ½ oz. 65c; oz. \$1.10.

CALENDULA (Orange King)—Outer petals are slightly imbricated, while those of the center are curved like a peony. Color glowing orange. Planted October to March, grows 1¼ feet high. Pkt. 15c; ½ oz. 65c; oz. \$1.10.

CALENDULA (Pacific Beauty)—Produces large blooms on long stems, exquisite persimmon orange. Pkg. 15c; ½ oz. 65c.

CALENDULA (Orange Shaggy)—New orange colored Calendula, grows 18 in. high. Planted October to March. Pkt. 15c; ½ oz. 65c; oz. \$1.10.

CALENDULA (Chrysantha)—Large double butercup yellow flowers, flowers incurved, extremely popular. Planted October to March. Pkt. 15c; ½ oz. 65c; oz. \$1.10.

CALENDULA (Lemon Ball)—Sulphur yellow, a very fine double flowering calendula and planted extensively. Planted October to March. Pkt. 15c; ½ oz. 65c; oz. \$1.10.

CALENDULA (Sensation)—Vigorous growth, flowers borne on stout stems, blossoms are flat, brilliant orange with a scarlet sheen and full yellow center. Planted October to March. Pkt. 15c; ½ oz. 65c; oz. \$1.10.

CANDELABRA (Cassia Alata)—Known as The Candle Tree—Bright yellow blooms. Easy to grow. Thrives best in sunny locations. Grows to height of about 5 ft. Planted from February to April. Pkt. 35c; ½ oz. \$1.00.

CANDYTUFT (Coronaria)—Hyacinth flowered white. A very fine variety. One foot high. October to April. Pkt. 15c; ½ oz. 75c; oz. \$1.35.

CANDYTUFT (Umbellata)—In separate colors, white, lavender, crimson. Pkt. 15c; ½ oz. 65c; oz. \$1.10. Rose, cardinal. Pkt. 15c.

CANDYTUFT—Mixed all colors. Pkt. 15c; ½ oz. 65c; oz. \$1.10.

CARNATION (Margaritas Robustus)—Fl. pl. semi-high double Margaret Carnation. Dwarfish habit, grows 12 to 15 inches high. The flowers are much variegated, occasionally producing yellow ones. October to April. Pkt. 20c; ½ oz. \$1.30; oz. \$2.25.

CELOSIA CRISTATA (Dwarf Cockscomb)—Very ornamental producing large head of crimson and yellow flowers 1 to 2 feet high. February till August. Pkt. 15c; ½ oz. \$1.00; oz. \$1.85.

CENTAUREA CYANUS (Double Cornflower)—A hardy annual of easy culture; various colors, 2 feet high. March to May. Pkt. 15c; ½ oz. 50c; oz. 85c.

CHRYSANTHEMUM TRICOLOR (Carinatum)—Summer Chrysanthemum. Showy Summer bloomers of different colors. 12 to 15 inches high. March to May. Pkt. 15c; ½ oz. 90c; oz. \$1.25.

COLEUS—A well known and beautiful bedding plant which can be easily propagated by seeds which produce different shades of colored plants. March to May. Pkt. 35c.

-GROW FLOWERS

COSMOS, SENSATION

GAILLARDIA

LARKSPUR

COSMOS SENSATION RADIANCE (new) — A striking new color combination never before seen in Sensation Cosmos. Deep rose petals overlaid with large well defined zone of rich crimson.
Pkt. 15c; ½ oz. 75c; oz. \$1.25.

COSMOS (Sensation Finest Mixed)—Mammoth size flowers, 4 to 5 inches in diameter, with broad, heavy fluted petals carried on very long stems. Mixture contains white and shades of rose and pink.
Pkt. 15c; ½ oz. 75c; oz. \$1.25.

COSMOS (Fiesta)—Makes a compact 2½ ft. plant with a riot of blooms all summer, blooms are semi-double and ruffled. A very desirous cutflower for the house.
Pkt. 25c.

COREOPSIS LANCEOLATA — Large, flowered, golden yellow, splendid cut flowers.
Pkt. 15c; ½ oz. 75c; oz. \$1.25.

CYNOGLOSSUM AMABLE (Chinese Forget-Me-Not)—A lively plant producing sprays of brilliant blue Forget-Me-Not like flowers. Grows easily and blooms for a long season. 18 to 24 inches high.
Pkt. 15c; ½ oz. 45c; oz. 75c.

DAHLIA—Large flowering Dahlia. Mixed. Seed sown in the spring will flower by June. February till June.
Pkt. 20c; ½ oz. \$1.25; oz. \$2.25.

DAHLIAS (Unwin's Dwarf Hybrids)—Produces branching plants 2 to 3 feet tall bearing semi-double flowers. Mixed colors.
Pkt. 20c; ½ oz. \$1.00.

SHASTA DAISY—An absolute perpetual bloomer throughout the whole year wherever it has a chance. October till April.
Pkt. 15c; ½ oz. 75c.

GLORIOSA DAISY SINGLE—Mixed yellow and golden orange and gold, contrasting dark center which sets off long petals. Fine cut flower.
Pkt. 35c; ¼ oz. 70c.

DIANTHUS BARBATUS (Sweet William)—Their beautiful colors make them very showy. Should be sown early, otherwise they will not flower the first spring; 1½ feet high. October till April.
Pkt. 15c; ½ oz. 70c; oz. \$1.10.

DIANTHUS CHINENSIS (Chinese Pink)—Single. A beautiful class of annuals of various colors which flower very profusely in early spring and summer. One foot high. October till April.
Pkt. 15c; ½ oz. 80c; oz. \$1.35.

DIANTHUS HEDDEWIGGI (Japan Pink)—Double. This is the most showy of any of the annual pinks. The flowers are very large and of brilliant colors; one foot high. October till April.
Pkt. 15c; ½ oz. 90c; oz. \$1.50.

DIMORPHOTECA (African Daisy)—Rich orange gold with dark center disc.
Pkt. 20c, postpaid.

ESCHSCHOLTZIA CALIFORNIA (California Poppy)—Single. A very free flowering plant, good for masses. Does not transplant well. One foot high. Yellow color. December till April.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.

GAILLARDIA (Blanket Flower)—Mixed. Planted in early spring, excellent for beds, borders or for cutting.
Pkt. 15c; ½ oz. 75c; oz. \$1.35.

GOLDEN GLOW (Rudbeckia)—Grows 3 feet high, branching freely and bearing by the hundreds on long, graceful stems; exquisite double flowers of brightest golden color and as large as a Cactus Dahlia. Perfectly hardy and blooms continuously throughout the summer months.
Pkt. 15c.

GOMPHRENA (White and Crimson Bachelor Button or Globe Amaranth)—Mixed. Well known variety of flowers; very early and free flowering; continues to flower for a long time. Two feet high. From February to August.
Pkt. 15c; ½ oz. 75c; oz. \$1.25.

GYPSOPHILA — White. Pure white, of easy growth, several sowings should be made during the season to keep up the supply. Planted March to June and grows 2 feet high.
Pkt. 15c; ½ oz. 65c; oz. \$1.00.

GERANIUM ZONALE (Zonale Geranium) — Mixed. Seed saved from large flowering varieties of different colors; should be sown in seed pans, and when large enough transplanted into pots where they can be left or transplanted in spring into the open ground.
Pkt. 35c.

HELICHRYSUM (Strawflower)—A very fine ornament for any garden and prized everywhere for winter decoration of vases, etc. Needs plenty of room to develop. Flowers for drying should be gathered when partially unfolded and suspended with their heads downward in a cool place.
Pkt. 15c; ½ oz. \$1.00.

HELIOTROPIUM (Heliotrope)—Mixed varieties with dark and light shaded flowers. Should be sown in hotbed if sown early. October till April.
Pkt. 25c.

LARKSPUR (Apple Blossom)—Very attractive spikes of pink blossoms.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.

LARKSPUR (Bright Carmine) — Long erect spikes of fiery carmine flowers—very lovely and effective.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.

LARKSPUR (Dark Blue)—Annual, long, erect spikes of beautiful dark blue blossoms.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.

Larkspur (Giant Imperial White King)— Flowers are a pure, glistening white. Florets are extremely large and fully double. Plants are tall, well over 5 feet, and cutting spikes 24 to 30 inches long.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.

LARKSPUR (Giant Imperial Mixed) — Very showy, 2½ feet.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.

LOBELIA (Erinum Lobelia)—A very graceful plant with white and blue flowers. Half foot. October till March.
Pkt. 25c.

LUPINS—Mixed. Free flowering, easily grown annual, with long, graceful spikes of rich and various colored pea-shaped flowers, valuable for mixed borders, beds, and for cutting; prefers a little shade. Planted from November to April, grows 1¼ feet high.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.

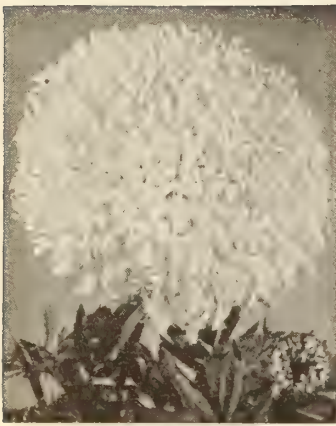

LUPINS (White)—Same as above but pure white flowers.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.

LUPINS (Blue) — Same as above but blue flowers.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.

MYOSOTIS (Palustris, Forget-Me-Not)—A fine little plant, with small blue star-like flowers. Half foot high. December till March.
Pkt. 25c.

MATRICARIA (Fever Few)—Double white. A perennial bearing small double white flowers, good for cutting.
Pkt. 15c; ½ oz. \$1.35.

Favorite Annual Flowers

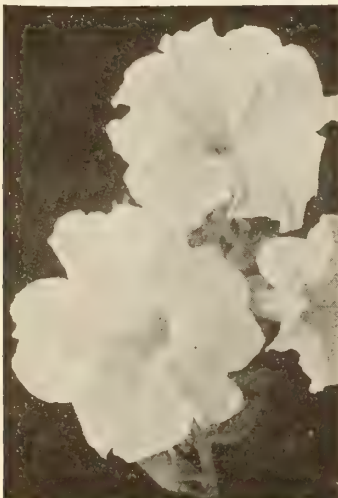

MARIGOLD, GLITTERS

NASTURTIUM, GOLDEN GLEAM

PANSY

PETUNIA, SNOW QUEEN

MARIGOLD (African or Tall Growing Marigold)—Very showy annual for borders with bright yellow flowers. Two and a half feet high. February to March; October to December.
Pkt. 15c; ½ oz. 70c; oz. \$1.25.

MARIGOLD (Petite Mixed)—New dwarf double French Marigold, compact in growth, about 6 inches tall. Pkt. 25c; ¼ oz. 75c.

MARIGOLD (Dixie Sunshine)—Sensationally new and fascinating large ball shaped flowers composed of dozens of tiny five-petaled florets, gracefully interlocking, daintly fringed in effect. Brilliant golden yellow. January to April.
Pkt. 15c; ½ oz. \$1.50.

MARIGOLD (French or Dwarf Marigold)—Covered with yellow and brown flowers. One and a half feet high. January to April.
Pkt. 15c; ½ oz. 90c.

MARIGOLD (Gigantea Sunset Giants)—Large flowers, produced in profusion, of delicate fragrance. Flowers are loosely formed, full centered, with broad heavy petals. Sunset Giants is a mixture ranging from deep orange through golden orange, deep golden yellow, light yellow, lemon yellow, and a delightful new shade of primrose.
Pkt. 15c; ½ oz. \$1.00.

MARIGOLD SPRY (French Dwarf)—Light orange, crested center and maroon outer petals. 6 to 8 in.
Pkt. 15c; ½ oz. 75c.

MARIGOLD (Yellow Supreme)—Fluffy well rounded blooms with frilled petals of rich lemon. October to December.
Pkt. 15c; ½ oz. 80c; oz. \$1.35.

MARIGOLD (Guinea Gold)—A distinct type growing 2 to 2½ feet tall, brilliant orange flushed with gold, an early blooming sort, loosely ruffled flowers. October to December.
Pkt. 20c; ½ oz. 80c; oz. \$1.35.

MARIGOLD (Tall African)—All double orange. Exactly like the tall African Marigold in size, but a deep orange color. Planted October to December.
Pkt. 15c; ½ oz. 80c; oz. \$1.35.

MARIGOLD RED HEAD (Dwarf)—Single French. Well shaped flowers made up of a single row of recurved petals, crested center. When first opening, blooms are rich mahogany red, changing to auburn and later to bronze and gold.
Pkt. 15c.

GLITTERS—A new chrysanthemum flowered African Marigold—grows about 2½ to 3 ft., bright lemon yellow blooms.
Pkt. 25c.

NEMOPHILA INSIGNS (Blue)—Makes a very effective front row to bed or border, also popular for pots. December to April.
Pkt. 15c; ½ oz. 50c.

NASTURTIUM (Tall)—Mixed. Same as above, makes an excellent screen for unsightly places. February to April and November and December.
Pkt. 10c; oz. 30c; ¼ lb. 80c.

PETUNIA, COMANCHE

NASTURTIUM (Dwarf)—Mixed. Blossoms red, yellow and salmon; used with leaves as salad. Seed pods while young and succulent picked and used as capers. February to April, and November and December.
Pkt. 10c; oz. 30c; ¼ lb. 80c.

NASTURTIUM (Golden Gleam, Flore Pleno)—A double sweet scented Nasturtium, golden yellow blooms with stiff, long stems. This is a distinct and new variety of Nasturtium and being offered for the first time.
Pkt. 10c; oz. 30c; ¼ lb. 80c.

NASTURTIUM (Double Gleam Hybrids)—A wide assortment of colors, sweet scented, foliage fresh green.
Pkt. 10c; oz. 30c; ¼ lb. 80c.

NASTURTIUM (Double Scarlet Gleam)—Flowers are fiery orange scarlet and almost three inches across and are uniformly well formed.
Pkt. 10c; oz. 30c; ¼ lb. 80c.

PANSY (Large Trimardeau)—Mixed. This is the largest variety in cultivation, the flowers are well formed, generally three-spotted, quite distinct; the plants grow compact. October to March.
Pkt. 25c; ¼ oz. \$1.25.

PANSY (Roggli's Giant)—Mixed. A very early variety of finest and rarest flowers and coloring. Very large blooms and is planted from October to March; grows about 8 inches high.
Pkt. 50c.

PETUNIA (Balcony)—Mixed. Single large flowering, makes an effective display over a long season.
Pkt. 25c; ¼ oz. 75c.

PETUNIA (Giants of California)—Mixed. Very large flowers and colors embrace every conceivable shade. Extensively planted. Planted October to May.
Pkt. 35c.

PETUNIA (Hybrida)—Mixed. Splendid mixed hybrid varieties. Plants are of spreading habit; about 1 foot high. October till May.
Pkt. 15c; ½ oz. \$1.35; oz. \$2.50.

PETUNIA (Snow Queen)—One of the best pure white Petunias, ideal for bed massing.
Pkt. 25c.

PETUNIA (Heavenly Blue)—A silvery blue, compact grower and free flowering.
Pkt. 25c.

PETUNIA (Purple)—One of the best rich velvety purple Petunias. Free blooming and compact.
Pkt. 25c.

PETUNIA (Rose of Heaven)—Rich, brilliant and effective rose color. Planted October to April.
Pkt. 25c.

PETUNIA (Rosy Morn)—A very pleasing clear pink with a broad white throat. A splendid sort for porch boxes, pots and beds. Planted October to April, grows 1 foot.
Pkt. 25c; ½ oz. 75c.

Pkt. 20c; 1/2 oz. 85c.

PORTULACA (Grandiflora, fl. pl.)—Mixed, Double Portulaca. The same variety of colors with semi-double and double flowers half foot high. February till August.
Pkt. 20c; 1/2 oz. \$1.35.

PYRETHUM ROSEUM—Hardy perennial, daisy-like flowers, fern-like foliage excellent for cutting. Planted after danger of frost is over, prefers sunny location, rich well drained soil.
Pkg. 50c.

QUEEN ANNE'S LACE—Hardy annual, large, loosely formed terminal clusters of tiny white flowers, used for cutting.
Pkt. 25c; 1/2 oz. 90c.

RESEDA (Odeora Grandiflora, Sweet Mignonette)—A fragrant plant with large spikes of yellowish red flowers. Fifteen inches high. December to May.
Pkt. 20c.

SALPIGLOSSIS (Painted Tongue)—Large flower mixed. One of the finest annuals, of easy culture and succeeds in any good soil and in a sunny location. Produces blooms all during summer until frost. Seed should be started in hotbeds about the end of March and planted out after danger of frost is over.
Pkt. 25c.

SOLANUM (Christmas Pepper)—Ornamental plant with attractive berries. Useful pot plant for winter decorations. November to February.
Pkt. 25c.

SALVIA (Scarlet Sage)—Well known decorative bedding plants. Can be grown as an annual as it flowers freely from seed the first year. Two to three feet high. February to April.
Pkt. 25c; 1/4 oz. 90c.

SALVIA (Bonfire)—Dazzling scarlet. Dwarf, compact grower. Height 1 1/2 feet.
Pkt. 25c.

SALVIA (Harbinger)—The finest and most striking of all bedding Salvias. The plants are symmetrical, dwarf, and compact.
Pkt. 25c.

SALVIA (Blue Beard, Blue Bedder)—Wonderful clear, dark blue flowers on long, wiry stems. Plant compact.
Pkt. 25c.

SCABIOSA (Mourning Bride)—Commonly known as the Pincushion Plant. Produces beautiful flowers in delicate shades on long stems. Makes very effective borders or beds. Planted after danger of frost is over, about March.
Pkt. 25c.

SNAPDRAGON (Canary Bird)—A very fine variety of giant yellow blooms, growing 24 to 36 inches high. Planted October to March.
Pkt. 25c; 1/4 oz. 70c.

SNAPDRAGON (Loveliness)—Rose pink blooms, giant flowered, grows 32 inches high. Planted October to March.
Pkt. 25c; 1/4 oz. 70c.

SNAPDRAGON (Rust Proof California Giant Mixture)—This mixture of rust proof Snapdragons is the best of all around type, equally fine for border or for cutting. The plants are of the popular Nanum Majestic type.
Pkt. 25c; 1/2 oz. \$1.00.

SNAPDRAGON (Crimson King)—Rich, crimson, semi-tall sort. Very good for bedding.
Pkt. 25c; 1/4 oz. 70c.

SNAPDRAGON (Shasta)—Pure white, a very desirable variety and rust proof.
Pkt. 25c; 1/4 oz. 70c.

STOCKS (Early Giant Imperial Improved Bismarck Mixed)—An extra fine early blooming mixed stock of branching habits, producing double flowers, splendid for cutting. Planted October to March.
Pkt. 15c; 1/4 oz. 75c.

STOCKS (Double Early Giant Imperial Bismarck)—Canary yellow. Same as above, but long spikes of yellow blooms.
Pkt. 15c.

STOCKS (Double Early Giant Imperial Bismarck)—Old rose blooms.
Pkt. 15c.

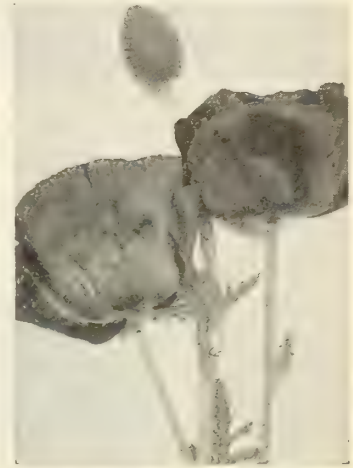

STOCKS (Double Early Giant Imperial Bismarck)—Fiery blood red blooms.
Pkt. 15c.

STOCKS (Double Early Giant Imperial Bismarck)—Silvery lilac blooms.
Pkt. 15c.

TEN WEEKS STOCKS—Mixed. Large flowers of all colors from white to dark blue or crimson. Should be sown in pots or pans, and when large enough transplant into rich soil. One and a quarter feet. October to March.
Pkt. 15c; 1/4 oz. 75c.

60c each, postpaid.

PURPLE GIANT—(I. D.) Very large, fine, true purple. An outstanding show Dahlia.
\$1.00 each, postpaid.

ROSE GLORY—(F. D.) Flowers are a sturdy deep pink.
60c each, postpaid.

WHITE FAVORITE—(C) large pure white cactus with perfect form and excellent growth habits.
65c each, postpaid.

MARY ELIZABETH—(F. D.) Ruby red, large flower and makes a vigorous bush.
75c each, postpaid.

PAISLEY GEM—(F. D.) Ball-like bloom of white with speckles and streaks of violet overall.
60c each, postpaid.

WATCHUNG GIANT—(I. D.) Light lemon yellow. A popular show variety.
60c each, postpaid.

GOLDEN LEADER—(I. D.) Giant clear yellow, splendid grower on long stiff stems.
75c each, postpaid.

HAWAII—(Pom.) Solid red, small flower of perfect shape and with good stems.
50c each, postpaid.

MORNING MIST—(Pom.) Soft pink with lavender shadings. Low growing bush, medium size flowers on good stems.
58c each, postpaid.

MARY MUNNS—(Pom.) Lavender, considered as the best of this type, small flower of perfect shape, good producer.
50c each, postpaid.

CANARY BIRD VINE

KOROSEAL PLASTIC GARDEN HOSE—Light in Weight—Reattachable couplings—25 ft. \$5.95; 50 ft. \$9.95, postpaid.

CLIMBING VINES

ANTIGONON LEPTOPUS (Rose Montana, Mountain Vine) — One of the finest perennial climbers of rapid growth with long racemes of beautiful deep pink flowers. Sow in February to June in the open ground. Will flower freely the first year. Pkt. 15c.

CANARY BIRD VINE—A dainty vine with beautiful cut leaves. Produces delicate flowers of clear canary yellow. Flowers resemble a bird with expanded wings. Does well in the shade. Planted March to June. Pkt. 20c.

CARDINAL CLIMBER—Very attractive, strong and rapid grower. Produces fiery cardinal red flowers from midsummer to frost. Does well in warm, sunny location and good rich soil. Planted March to June. Pkt. 20c.

CONVOLVULUS MAJOR (Morning Glory) — Mixed. A well known vine with handsome colored flowers of easy culture. Grows almost anywhere. Ten feet high. February till July. Pkt. 15c.

DOLICHOS LABLAR—Mixed. Hyacinth Beans, free growing plant with purple and white flowers. March till June. Pkt. 15c.

KUDZU VINE—A leguminous vine somewhat resembling the Velvet Bean in appearance. It is perennial and comes from the root each spring and makes as much growth by about the first of May as the Velvet Bean makes in an entire season, and that on ordinary soil, without fertilizer of any kind. When once established Kudzu thrives as well on the poorest sandy upland as on the best lands. It gathers nitrogen from the air and consequently is a soil improver. Kudzu may be cut from two to four times during the season or pastured. Plant February to July. No seed to offer. Pkt. 20c.

IPOMOEA (Scarlet O'Hara Morning Glory)—Early bloomer, carmine red, sometimes called carmine, medium size blooms until frost and stays open longer than most Morning Glories. Foliage is quite distinct, each leaf with one large and two small size lobes. Pkt. 15c; 1/2 oz. 65c.

IPOMOEA QUAMOCLIT ALBA (White Cypress Vine)—The same as the red variety. February to June. Pkt. 20c.

IPOMOEA HEAVENLY BLUE (Improved Morning Glory) — Deep, intense blue, shading lighter towards the center. The flowers are large and freely produced and plants do not make rank growth and flowers early in the season. Pkt. 15c; 1/2 oz. 50c.

IPOMOEA QUAMOCLIT ROSEA (Red Cypress Vine)—Very beautiful red flowers. Twenty feet. February to June. Pkt. 20c.

IPOMOEA BONANOK (The Blue Moonflower) —This distinct and charming novelty is valuable on account of being in beautiful and striking contrast with the White Moonflower. February to June. Pkt. 15c.

IPOMOEA NOCTIFLORA — Large flowering Evening Glory (the White Moonflower). A vine of rapid growth with beautiful, delicate foliage of rapid growth, with white flowers. February to June. Pkt. 15c.

GIANT IMPERIAL JAPANESE MORNING GLORY — Mixed. The vines are of robust growth, obtaining a height of from 30 to 40 feet. The foliage varies greatly, some plants having yellow or silver foliage, while others are blotched and mottled. February till July. Pkt. 15c.

MORNING GLORY (Pearly Gates)—All-America winner. Lovely lustrous white with creamy shading deep in throat. Average 4 to 4 1/2 inches across. Bloom from middle summer to first frost. Pkt. 15c.

THUNBERGIA (Black Eyed Susan) — Lovely trailing plant with large showy flowers. Very pretty flowers in buff, white, orange, etc., with dark eyes. Mixed colors. Planted during January to March. Pkt. 15c.

WISTERIA (Blue) — This is one of the most popular of our hardy vines, growing rapidly; in bloom it is truly magnificent, bearing long pendulous clusters of flowers; growing to a height of 50 feet or more. February to May. Pkt. 15c.

GLADIOLUS . . .

Finest Flowers for Cutting

- CHAS. DICKENS**—Purple violet, beautiful form. 11c each; \$1.10 doz., postpaid.
- COMMANDER KOEHL**—An outstanding variety in form and color. Gigantic flowers of dark scarlet, well formed, no blotches. 12c each; \$1.25 doz., postpaid.

Flowering SHRUBS

FLOWERING ALMOND

Shrubby and plants herein offered are subject to our being able to supply this season, due to labor conditions and shortage of plants of all kinds.

ABELIA GRANDIFLORA—Most beautiful, popular and satisfactory broadleaf evergreen. Foliage a dark glossy green, covered from early spring to late fall with bell-shaped white and pink flowers. In winter its leaves turn metallic bronze color.
2 yr. plants \$1.35 each, postpaid.

FLOWERING ALMOND — Of upright growth. Hardy with lovely pink flowers in early spring. Tiny little leaves borne on long stems make it very useful in any landscape. 2 to 3 ft. \$1.15 each, postpaid.

ALTHEA (Purple)—Same description as Red Althea only blooms are large, double lavender.
18 to 24 in. \$1.15 each, postpaid.

ALTHEA BEU DE FEU (Double Red) — Tall growing bush form plant. An abundance of large double red flowers. Hardy and easy to transplant. Blooms fine in July, August and September.
18 to 24 in. \$1.15 each, postpaid.

ALTHEA JEANNE d'ARC (White Althea)—Same description as the Red Althea, only blooms are large, double white with carmine centers.
18 to 24 in. \$1.15 each, postpaid.

AMERICAN RED BUD (Judas Tree)—This plant needs no description as you all know its lovely form, its beautiful pink and rose-colored flowers, and its use as a background or single specimen plant. The tree is exceptionally hardy, a very fast grower and exquisite in every respect.
2 to 3 ft. \$1.35, postpaid.

BUTTERFLY BUSH — A new, very compact, rather dwarf type. Commonly called Butterfly Bush, Buddleia or Summer Lilac. Beautiful green foliage with gorgeous purple and lavender blooms in immense clusters. Strong 2 ft. plants, \$1.35 each, postpaid.

CRAPE MYRTLE—The glory of the South. Extremely hardy, does well in any soil, can be planted in full or half sun. Blooms from mid-summer until frost, when most flowers are gone.
Colors: red, pink, lavender. Specify color wanted. 2 ft. plants, \$1.25 each, postpaid.

CYDONIA JAPONICA (Japan Quince)—Commonly called Evergreen Burning Bush or Flowering Japonica. Produces a brilliance of scarlet-red flowers almost before snow leaves the ground. Tall, slow growing, bush form shrub. Suitable for use as single specimens, hedging, or any place where a blaze of red color is desired. The most beautiful of all the flowering shrubs in the South. Hardy everywhere.
2 ft. plants \$1.25 each, postpaid.

PURPLE LEAF PLUM—Ornamental tree with deep pink flowers appearing along the branches before the red foliage appears.
\$1.75, postpaid.

VITEX (Chaste Tree)—Beautiful late blooming shrub with lilac-blue spikes. Sage green foliage.
\$1.35, postpaid.

MOCK ORANGE—Of upright growth reaching a height of about 5 feet. Very small, dainty leaves of a dark green color. Highly scented, beautiful white flowers.
18 to 24 in. \$1.25 each, postpaid.

PINK HONEYSUCKLE—Exactly like the red bush except the flowers are small pink with an abundance of them.
2 ft. plants \$1.25 each, postpaid.

RED BUSH HONEYSUCKLE—A lovely plant of upright growing habit ranging in size from 3 to 5 feet. Small, dainty little leaves with an abundance of small red flowers followed by red berries make it one of the most loved plants grown in the nursery.
2 to 3 ft. \$1.25 each.

RED FLOWERING PEACH—A large type of flowering tree with the same foliage as the fruit tree. It is beautiful when in bloom during the early spring with its large double red flowers. It is a solid mass of blooms.
2 ft. plants \$1.75 each, postpaid.

DEUTZIA (Pink)—Large, double pink flowers with a shading of rose. Very hardy, attractive, and does well in any soil. One of the first plants to bloom in early spring.
2 to 3 ft. \$1.15, postpaid.

FORSYTHIA—Erect growing, tall and slender. Especially desirable for tall backgrounds. Lovely golden flowers of rich yellow. One of the first shrubs to bloom.
2 ft. plants \$1.15 each, postpaid.

FORSYTHIA

RED LEAF BARBERRY—Similar to the popular Green Leaf Japanese Barberry, only its foliage as it develops in early spring assumes a deep bronze red color which it keeps until fall when it changes to vivid orange-scarlet and red shades.
2 ft. \$1.15.

MALUS HOPA (Flowering Crab) — Vigorous grower, dark pink blooms.
2 to 3 ft. \$1.75 each, postpaid.

SPIREA BILLARDI—A low growing, graceful flowering shrub. Blooms on long spikes or stems, with gorgeous lavender flowers. Fast grower, reaches about 3 feet in height.
2 to 3 ft. \$1.15, postpaid.

SPIREA ROSEA—A grand shrub for group or mass planting. Has dense foliage with long stems of beautiful rose shaded flowers. Very pretty and showy. Blooms from July to September.
Strong 2 ft. plants \$1.15 each, postpaid.

SPIREA VAN HOUTTEI—One of the most beautiful of all the Spirea family. In early spring the plant is covered with small, dainty, white flowers. It looks like a white snowbank. Has a splendid form with long draping branches of light green. Can be used for screening or background work.
2 ft. plants \$1.35 each, postpaid.

WEIGELA ROSEA—Tall growing with deep pink, trumpet shaped flowers borne thickly along stems. They bloom abundantly throughout the summer.
18 to 24 in. \$1.15, postpaid.

WHITE FLOWERING DOGWOOD (Cornus Florida)—Tree form. Solid mass of beautiful white blooms in early spring. Foliage dark green with very attractive leaves. Very hardy.
2 to 3 ft. plants \$2.35, postpaid.

YELLOW JASMINE—Its branches are beautifully arched, overhanging the ground from the inner edges. Foliage dark green, covered with gorgeous little yellow flowers all summer.
Strong 2 yr. plants \$1.15 each, postpaid.

PINK FLOWERING DOGWOOD—Beautiful mass of pink blossoms in early spring.
2 to 3 ft. plants \$3.25, postpaid.

VINES and CLIMBERS

WISTERIA

WISTERIA—For trailing over buildings, plazas, verandas or trellises, the decorative features which their long graceful blossoms afford make a particularly pleasing effect. We have these in light blue and white.
24 in. \$2.15 each, postpaid.

CHRYSANTHEMUM

The Flower for All Saints Day for cemetery decoration. Planted any time after the ground can be worked up to July 1, will give good blooming plants in the fall. Our plants are ready March 1 and we recommend early planting for perfection of blooms.

MRS. H. ROBINSON—Our best white variety, can be depended on to bloom for Nov. 1.
Prices on the above: 20c each; \$2.50 per dozen; \$12.00 per 100, postpaid.

MOCK ORANGE

Fruit and Nut Trees Grape Vines

**Budded
Fruit
Trees**

FIGS

FIGS—Plant figs where they will not be disturbed and in rich soil, heavily manured.
BRUNSWICK or MADONNA — 3 to 4 feet. Large purple fig, fine in flavor. Each \$1.50, not postpaid.
CELESTE—3 to 4 feet. Medium size, purple to blue, very sweet and a favorite. Each \$1.50, not prepaid.
JAPANESE VIOLET—3 to 4 feet. About three times the size of the Celeste, very good and popular. Each \$1.50, not prepaid.

MULBERRY

MULBERRIES—They form economic food for poultry and swine and to keep birds away from other fruit.
HICK'S—3 to 4 feet. Black, large fruit excellent for eating and canning.
SOLD OUT.

APPLES

FINE APPLES—Apples are fast increasing in favor here in the South and every home orchard should have several varieties for a full season's supply.
Early Red June—Medium to large, excellent keeper.
 Delicious—Mellow, large, excellent eating and good shipper.
Early Harvest—Similar to Ben Davis, but 10 days earlier.
 \$1.35 each, not prepaid.

ORTHO HOME ORCHARD SPRAY
 14 oz. \$1.39; 1 lb. 12 oz. \$2.49.
 For Worms in Peaches—Pan Peach Spray, 1 lb. 70c.

PERSIMMONS

PERSIMMONS—Large, smooth, conical, orange to bright red and of highest quality. Vigorous and productive.
TANE NASHI (Japanese) — 3 to 4 feet. Very large, flat, yellow seedless fruit, very sweet. Each \$2.25, not prepaid.

PEARS

PEARS—Favorite of any home orchard where a variety of fruits is desired. From the small sugar, juicy varieties to the large hard-cooking kind, our soils are adapted to their culture. The "Pineapple" variety is practically blight proof and is well adapted to growing in blight regions.
ORIENT—Blight proof pear, very good quality for eating and cooking, free very vigorous and prolific bearer. This variety is highly recommended over the Bartlett. 3 to 4 ft. \$1.75, not prepaid.
BARTLETT—3 to 4 feet. Large, clear, bright yellow, juicy, a favorite. Each \$1.75, not prepaid.
KIEFFER'S HYBRID—3 to 4 feet. Yellow with bright vermilion cheek, juicy and large. Each \$1.75, not prepaid.
LECONTE—3 to 4 feet. Pale yellow, smooth skin, large, a favorite in the South for preserves and eating. Each \$1.75, not prepaid.

APRICOTS

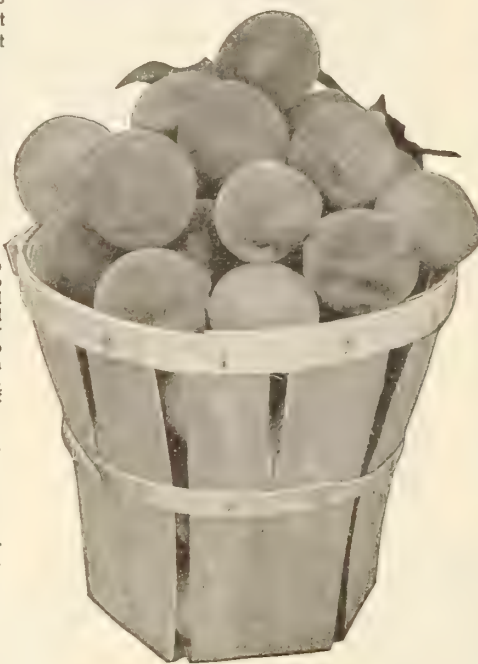

APRICOT—3 to 4 feet. Fruit of Apricot is similar in shape to the Peach, except that it is not downy and is almost perfectly round. Flavor very fine. 3 to 4 ft. \$1.50.

CHERRY

MONTMORENCY—Red. Sour. 3 to 4 ft. \$1.75, not prepaid.

ORANGES

ORANGE TREES — In planting an orange grove, it is poor business to plant cheap trees. Orange trees to prove vigorous and prolific should have large, well formed root systems and strong, clean, healthy tops one or two years old. Our trees are grown on loose sandy, loam land, which permits the root systems to develop properly.
DUNCAN GRAPE FRUIT—2 to 3 feet. One of the best and largest thin skin. 24 to 30 in. \$2.50 each, not prepaid.
KUMQUAT—2 to 3 feet. Used for preserving, small size and profuse bearer. 24 to 30 in. \$2.50 each, not prepaid.
LOUISIANA SWEET—2 to 3 feet. Medium size, thin skin, very sweet. 24 to 30 in. \$2.50 each, not prepaid.
MANDARIN—2 to 3 feet. Medium in size, flattened, deep yellow in color, skin thin and of fine texture, glove skin. None.
SATSUMA—2 to 3 feet. Large glove skinned, sweet, excellent quality. 24 to 30 in. \$2.50 each, not prepaid.
WASHINGTON NAVEL ORANGE—2 to 3 feet. Fruit large, red-orange in color, skin thick, smooth and tough; seedless. 24 to 30 in. \$2.50 each, not prepaid.

PLUMS

Wide choice in following varieties:
ABUNDANCE—3 to 4 feet. Large, heavy, bearing roundish yellow skin. Each \$1.75, not prepaid.
BRUCE—3 to 4 feet. Dark purple skin, blood red flesh, excellent preserver. Each \$1.75, not prepaid.
BURBANK—3 to 4 feet. Purplish red, deep yellow flesh, large and sweet. Each \$1.75, not prepaid.

GRAPES

For All Purposes
MOORE EARLY—1 year old. Blue black, early, sweet and very prolific. Each \$1.00, not prepaid.
CONCORD — Blue black, thick flesh, very sweet, an old standby. Each \$1.00, not prepaid.
LUTIE—Light red color, very compact in the bunch and absolutely rot-proof and of high quality. Each \$1.00, not prepaid.
SCUPPERNONG—Very popular, bronze color, well known throughout the South. Each \$1.50.
WHITE NIAGARA — Creamy white, large, transparent and very sweet. Each \$1.00, not prepaid.

PEACHES

PEACHES—The most popular fruit tree planted in the South and by far the most satisfactory and easiest grown. No orchard is complete without several popular peaches.
BELLE OF GEORGIA—3 to 4 feet. Sweet, freestone, white skin and flesh, pink cheek. Each \$1.35, not prepaid.
CHINESE CLING—3 to 4 feet. Sweet, clingstone, white flesh, creamy skin, pink cheek, large. Each \$1.35, not prepaid.
ELBERTA—3 to 4 feet. Large size, freestone, yellow skin and flesh, red cheek. Each \$1.35, not prepaid.
J. H. HALE—3 to 4 feet. Large yellow freestone, red cheek, round shape, excellent flavor. Each \$1.35, not prepaid.
MAYFLOWER—3 to 4 feet. Early, large, well colored clingstone, excellent quality. Each \$1.35, not postpaid.

PECAN TREES

A Real Money Crop

Proper Distance Apart for Planting
 In deep alluvial soils 70 feet apart each way, requiring 9 trees to an acre. In sandy, poor soils, 50 feet apart each way, requiring 17 trees to an acre. Our trees are very fine and true to kind and variety.
FROTSCHER'S (Eggshell)—Nut large, oblong in shape, very thin shell. Kernel plump, full, quality good, abundant bearer, rapid grower. A very popular variety.
STUART—Nut large, thin shell, oblong in shape, full meated, best quality, abundant bearer of rapid growth, popular.
SUCCESS—Nut large and round with medium thin shell full and containing a larger quantity of meat than any other pecan on the market.
SCHLEY—Nut medium size, oblong in shape, smooth, clean and bright in color, very thin shell, kernel very plump and rich.
VAN DEMAN—One of the most attractive in appearance, rich, well flavored, medium large, elongated.

ORTHO INSECTICIDES AND FUNGICIDES

ORTHO DIELDRIN SPRAY—Contains powerful Dieldrin in handy liquid spray concentrate form. Use to control ants, Japanese beetles, grasshoppers, lawn moths, chinch bugs, armyworms, sowbugs, thrips, earwigs, and many other insect pests.

8 oz. \$1.40; pt. \$2.19; qt. \$3.79.

ISOTOX GARDEN SPRAY—Multi-purpose garden insecticide containing combination of Malathion, Lindane and DDD. Kills aphids, red spiders, thrips, box elder bugs, Japanese beetles, rose chafers, caterpillars, lacebugs, lawn moths, armyworms, mole crickets, white grubs, chinch bugs, cutworms, earwigs, ants, flies, mosquitoes, wireworms, and many other pests. Use on flowers, shrubs, fruit trees and certain vegetables.

4 oz. \$1.19; 8 oz. \$1.98; pt. \$2.98; qt. \$4.98.

ORTHO ROSE and FLOWER BOMB — A combination insecticide-fungicide-miticide rose spray packaged in easy-to-use aerosol bomb.

14 oz. aerosol \$1.59.

ORTHO ROSE DUST—Contains the most effective fungicide and insecticides to make the finest multi-purpose rose and flower garden dust or wettable powder on the market, for the control of most insects such as aphids, Japanese beetles, Thrips, certain caterpillars, lacebugs, rose weevils, red spider mites; and plant diseases, such as black spot, powdery mildew, leaf spot and rust.

8 oz. duster \$1.19; 1 lb. \$1.49; 4 lbs. \$3.79.

ORTHOICIDE GARDEN FUNGICIDE—Amazing versatile fungicide containing captan. Controls black spot on roses, powdery mildew on tuberous begonias; rot and damp-off on bulbs and seed cuttings; seed rot and damp-off on certain seeds; brown patch and other diseases on lawns. Another Ortho farm-tested product.

8 oz. \$1.39; 1 lb. \$2.19; 2 lbs. \$3.29.

FLORIDA VOLCK PASTE EMULSION—An oil paste emulsion especially prepared for use on azaleas, camellias, and citrus against scale insects, red spider mites, white flies, mealybugs.

Pt. 79c; qt. \$1.49; gal. \$3.19.

VOLCK OIL SPRAY—A highly refined oil spray for use against mealybugs, scale insects, red spiders, and white flies on plants. This fine product also acts as an excellent spray carrier.

4 oz. 39c; pt. 79c; qt. \$1.49; gal. \$3.49.

ORTHO ROTENONE DUST or SPRAY — Contains 1% Rotenone and other cube resins for effective control of a wide range of insect pests on garden vegetables and flowers.

1 lb. 69c; 4 lbs. \$1.39.

VOLCK ISOTOX SPRAY—A petroleum oil base formulation containing Lindane and DDT. A multi-purpose insecticide. High wetting and spreading qualities.

4 oz. 49c; 8 oz. 69c; pt. \$1.19; qt. \$1.98.

ORTHO MALATHION 50 SPRAY—An insecticide containing Malathion for use on evergreens, roses, ornamentals, shrubs, trees, etc. Controls red spiders, aphids, mealybugs, scale, flies, plus certain other pests.

4 oz. \$1.19; 8 oz. \$1.98; pt. \$2.98; qt. \$4.98.

BOTANO DELUXE GARDEN DUST—Contains Captan, Lindane, Methoxychlor, Ziram. A truly fine multi-purpose garden dust to control aphids, thrips, certain caterpillars, sowbugs, earwigs, ants, Japanese beetles, diabrotica larvae, black widow spiders, wireworms, sod webworms; and difficult plant diseases like black spot of roses, carnation rust and leaf spot, powdery mildew of tuberous begonias, etc.

8 oz. duster \$1.19; 1 lb. \$1.39.

ORTHO-KLOR 44 CHLORDANE SPRAY —

An outstanding control of ants, lawn moths, cutworms, sowbugs, chinch bugs, thrips, brachyrhinus (strawberry root weevil), Japanese beetle grubs, and many other garden pests. Has long residual killing power.

4 oz. 79c; 8 oz. \$1.19; pt. \$1.98; qt. \$2.98.

PEST-B-GON 50% DDT WETTABLE—Contains 50% DDT. Use as a spray to control garden and household pests such as thrips, chinch bugs, sod webworms, plant bugs, Japanese beetles, ants, certain worms, leafhoppers, fleas.

1 lb. 98c.

ORTHO LAWN SPRAY—Contains DDT and BHC to clear up bare spots, brown patches and sickly areas in lawns by killing chinch bugs. New Ortho lawn spray will do it! Easy to apply.

Qt. \$1.49; gal. \$4.59.

ORTHO BORER SPRAY—A 20% Lindane spray recommended for control of most borers attacking trees and shrubs.

8 oz. \$1.79; pt. \$2.98.

ORTHO-GRO LIQUID PLANT FOOD—Contains organic fish in a balanced fertilizer formulation plus a chelating agent to help correct chlorosis and supply needed important minor elements. Fast working and available to the roots and foliage, giving quick plant response.

4 oz. 39c; pt. \$1.00; qt. \$1.69; gal. \$4.98.

ORTHO SOWBUG BAIT—Effective new insect bait containing Malathion and DDVP. Use around dwellings, in dark places wherever sowbugs are prevalent.

1 lb. 98c; 5 lbs. \$2.29.

ORTHO ROSE and GARDEN FUNGICIDE—Contains 75% Phaltan. New Ortho scientific achievement for control of both mildew and black spot on roses.

6 oz. \$1.98; 11 oz. \$3.59; 1½ lb. \$6.95.

ORTHO BHC WETTABLE—A Benzene Hexachloride spray or dip for control of lice, ticks, and mange on cattle, hogs, sheep, horses and certain other animals.

5 lbs. \$2.25.

ORTHO TOMATO VEGETABLE DUST — A multi-purpose vegetable garden dust containing Methoxychlor, Rotenone and Captan especially formulated for control of tomato fruitworms, Colorado potato beetles, aphids, cucumber beetles, leafhoppers, blister beetles, squash vine borers and specific pests of certain vegetables. Also gives effective control of important plant diseases of potatoes, tomatoes, beans, peppers, eggplants and some other vegetables.

10 oz. duster \$1.39; 1 lb. \$1.39.

ORTHO BUG-GETA PELLETS—Compressed Metaldehyde-Arsenical bait designed to kill slugs, snails, cutworms and strawberry root weevils. Broadcast pellets by hand scattering 10 to 12 pellets per sq. yd. and sprinkle lightly with water. Each pellet dissolves into a small mound of readily available bait.

1 lb. 59c; 2½ lbs. \$1.19; 6 lbs. \$2.39.

ORTHO ANT and ROACH BOMB—Made to order for crawling insects. Contains Malathion to control resistant roaches plus long lasting residual control with Dieldrin nationally advertised for household pests. Pyrethrins and piperonyl butoxide for fast effective knockdown.

11 oz. aerosol 98c.

NEW ORTHO LAWN DISEASE CONTROL—Controls Brown Patch, Dollar Spot, Gray Leaf Spot. Contains Captan, Cadmium and Terraclor.

1 lb. \$2.98; 2 lbs. \$4.98.

SCRAM DOG REPELLENT BOMB—Push button repelling of dogs. Proven sales appeal. For protection of trees, shrubs, flowers, store fronts, garbage cans and other areas where dogs are in the habit of returning.

11 oz. aerosol bomb \$1.49; 8 oz. powder 69c.

SNAROL, with Metaldehyde—A sensational new product that kills cutworms, sowbugs, snails, grasshoppers, etc. A ready prepared bait meal. It is not injurious to vegetation. Will not deteriorate from rain or sprinkling.

1 lb. package 60c; 2½ lb. package \$1.10; 6 lb. package \$2.25.

SNAROL PELLETS. 1 lb. pkg. 60c; 2½ lbs. \$1.10.

ACME PESTICIDES for Garden and Home Surroundings

ACME ALL ROUND DUST

Dust and duster all in one. Contains 5% Methoxychlor, .75% Rotenone, 4% Ferbam, and 4% Ziram. Two insecticides and two fungicides combined for control of common insects and plant diseases. Effective on flowers, vegetables, bush fruits.

8 oz. pump gun \$1.25; lb. \$1.45.

ACME TOMATO DUST—Tomatoes require special treatment. Contains basic copper arsenate and basic copper sulphate for control of hornworm, fruit worm, flea beetle, early and late blight. 1 lb. will cover 75 to 120 plants one application.

8 oz. pump gun 98c; 1 lb. \$1.00; 4 lbs. \$2.20.

ACME BORDEAUX MIXTURE

Standard Copper Fungicide. Contains 50% Copper Sulphate (12.75% metallic copper), 50% Lime. Controls many diseases of fruit trees, grapes, potatoes, flowers and shrubs. Repels leafhoppers and flea beetles.

1 lb. \$1.15; 4 lbs. \$2.35.

ACME DURADUST #50

50% DDT wettable powder. The most economical form of DDT in common use. Kills many insects on fruit and shade trees, corn, potatoes, and other row crops. Used in farm buildings to control flies, ticks, blue bugs, poultry red mite.

1 lb. \$1.25; 4 lbs. \$2.45.

ACME ARSENATE OF LEAD

Use to control leaf-eating and fruit-eating insects, including codling moth larvae on apples and pears, lawn moths (sod webworms), leaf-eating caterpillars, Japanese beetle larvae, and white grubs.

1 lb. \$1.25; 4 lbs. \$2.35.

ACME DUSTING SULPHUR

For garden and lawn use. Contains 95% Sulphur. Controls mildew, black spot, leaf spot, almond mite, two-spotted mite, red spider, thrip on roses, chrysanthemums, snapdragons, dahlias and most other flowers. Very effective for chigger control in lawns.

2 lbs. \$1.00.

ACME WEED KILLER

DESTROYS ALL VEGETATION. A total weed killer of quick acting 42.5% Sodium Arsenite solution. Used to eradicate weeds and unwanted vegetation on driveways, parking areas, cracks in sidewalks, fence rows, etc. Will not stain stone or concrete. Highly effective in destroying unwanted trees. One gallon concentrate covers 320 square feet. Sterilizes soil for up to two years.

Pint \$.75
 Quart 1.00
 Gallon 2.85

SEVIN GARDEN DUST—5% Sevin Controls a broad range of insects on vegetables, fruit, ornamentals and lawns. Can be used up to harvest. For fleas and ticks on dogs and cats.

2 lb. bag 98c, postpaid.
 4 lb. bag \$1.48, postpaid.

ACME ROSE DUST—A rose lover's dream. Contains 7% Captan for black spot; .75% Capryl for powdery mildew; 4% Malathion (premium grade) for aphids, thrips, lacebugs, many other insects; and 5% DDT for rose chafer and other beetles. Colored green to blend with foliage. Use as a dust or spray.

8 oz. \$1.45; 1 lb. \$1.55.

ACME 10% CHLORDANE DUST—Fire ant control. Same uses apply for this product as 6% Chlordane Dust above except cannot be used inside homes.

1 lb. 80c; 4 lbs. \$1.95.

ACME LIME SULFUR SPRAY (LIQUID)

Dormant spray. Contains 29% calcium polysulfides. To be used before sap returns as a cleanup spray of scale insects, rusts, and mildew on fruit and shade trees, rose bushes, shrubs and nursery stock.

Qt. \$1.25, postpaid. Not prepaid, gal. \$3.00.

ACME GARDEN GUARD

Safe on garden vegetables. 1% Rotenone is harmless to humans and pets. Can safely be used right up until harvest time without fear of harmful residues. Controls a wide range of insects preying on beans, cabbage, currants and many other vegetables, also flowers.

1 lb. 80c; 4 lbs. \$1.95.

ACME 50% MALATHION SPRAY

Safe type phosphate spray. Controls aphids, mites, mealy bugs, scale and many insects attacking flowers, vegetables, evergreens, ornamentals, fruit and shade trees. Also useful as a fly and mosquito control.

4 oz. \$1.35; 8 oz. \$2.00; pt. \$3.25; qt. \$4.70.

ACME 45% CHLORDANE SPRAY

ACCEPTED CONTROL on lawns for ants, chiggers, white grubs, grasshoppers, sod webworm, others. In garden soil controls cutworms, wireworms, others. Controls household pests such as ants, roaches, silverfish, crickets, spiders, box elder bugs, termites, others.

8 oz. \$1.15
 Pint 2.00
 Quart 3.00

2 oz. bottle \$1.19; 6 oz. bottle \$2.39; 12 oz. bottle \$3.49.

50% TECHINAL METHOXY-CHLOR—Wettable Powder. A residual insecticide, for vegetables, fruits, flowers and ornamentals. Also used for Dairy Cattle and other animals for control of horn flies, lice and fleas.

½ lb. \$1.50.

SEVIN 50% Wettable Powder—Soluble in water for use on insects the same as the 5% Dust and can be used up to date of harvest.

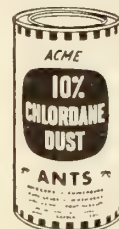

2 lb. bag \$2.35, postpaid.
 5 lb. bag 5.32, postpaid.

SPREADER STICKER—Increases the efficiency of sprays by its sticking and spreading ability.

1 oz. 65c; pt. \$1.60; gal. \$8.90, postpaid.

WONDER FUNGICIDE—For azalea petal blight, black spots on roses, gladioli diseases, mildew on cantaloupe and cucumber, and blight on tomato, celery, potato and pepper.

4 oz. 45c; pint \$1.50; gallon \$6.10.

"Warf" Rat Pellets—Warf is certified safe. No threat to children, pets, etc., when used as directed.

Lb. \$1.10, postpaid.

EVERGREEN—Kills chewing and sucking types of insects, including the Japanese beetle. Non-poisonous and pleasing to use. Won't burn delicate blooms.

1 oz. 40c; 6 oz. \$1.35; pint \$2.90.

FERMATE—New fungicide gives remarkable control of plant diseases, with safety to all plants. Reliable specific for black spot on roses, leaf spot on chrysanthemums, snapdragon rust, anthracnose of tomatoes, and brown rot of cherries. Recommended for use against all fungi and mildews.

8 oz. \$1.10; postpaid \$1.25.

SABADILLA DUST—Controls many hard-to-kill insects like Stink Bugs, Squash Bugs, Mexican Bean Beetle, etc. Non-poisonous when used as directed.

Lb. \$1.00; 5 lbs. \$3.25, postpaid.

RED ARROW GARDEN SPRAY

—Kills many varieties of both sucking and chewing insects on vegetables, flowers, and fruits. Red Arrow is a highly concentrated pyrethrum extract containing soap. Non-poisonous. Use as directed. Will not injure foliage.

2 oz. 69c; 4 oz. \$1.19; pint \$3.49; gal. \$25.00.

APHINE—Spray for green, black and white fly, red spider, thrip, mealy bug, white and brown scale.

60c per ½ pint; \$2.00 per quart; \$5.50 per gallon, not mailable.

LAWN-A-GEN—For subterranean infestations. Outstanding control for underground soil pests, including Nematodes; also effective against fungus infestations. Can be used where plants are growing.

4 oz. 80c; 8 oz. \$1.35.

PARA-DI-CHLORO-BENZENE—Sometimes called Para; for peach tree borer and tobacco blue mold. Tests show approximately 95% control. Apply in the spring when the ground is dry, also in September or October. Spring applications kill 70 to 75% of the borers. One pound treats ten trees.

1 lb. pkg. 75c, postpaid.

TREE TANGLEFOOT—Applied to trees, keeps ants and caterpillars from crawling up; a sure cure for most insect troubles on all kinds of trees.

5 oz. \$1.00; lb. \$1.65, postpaid.

ZINEB 75-W—For use on Azaleas for Petal Blight. Begin spraying when buds begin to appear, 3 applications per week for 3 weeks.

3 lb. pkg. \$2.85, postpaid.

TOBACCO DUST—If dusted on the foliage it destroys rose lice, cabbage and turnip fleas.

5 lbs. 95c; 10 lbs. \$1.50; 50 lbs. \$4.00, not prepaid.

SPRAYERS and DUSTERS FOR INSECTICIDES

No. 9-A HUDSON FAVORITE

GARDEN GUIDE SOIL ACIDITY TEST

The Garden-Guide is a simple chemical test for accurately determining the acid (sour) or alkaline (sweet) nature of soil. Complete with sampling equipment, indicator solution, porcelain test plates, color charts and booklet containing listings of soil preferences of plants.

Price \$2.00, postpaid.

RUBBER KNEE PADS—Ideal for gardening. \$2.50 pair.

ferti.lome

"The Nation's Finest Line of Specialty Plant Foods"

5-lb. & 1-lb. Carton Line

Azalea-Camellia-Gardenia Food

Creates an acid soil condition which produces healthy, beautiful, acid-loving plants. Contains cottonseed meal, bone meal, and blood meal plus iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN. Good for all acid-loving plants.

1 lb. 39c, 5 lb. 98c, 10 lb. \$1.75, 25 lb. \$2.95, 50 lb. \$3.95, 100 lb. \$6.50.

Bulb Food

Promotes larger blooms; encourages increase in bulb size and number; contains iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN. Contains proper amounts of all plant foods.

1 lb. 39c, 5 lb. 98c.

Tree and Shrub Food with "Penetrating action"

Not necessary to dig holes . . . just spread on surface . . . water in thoroughly . . . "penetrating action" does the rest. Contains cottonseed meal, bone meal, and blood meal plus iron, zinc, copper, manganese, boron, and molybdenum in chelated form from Multi-TRACIN. For all types of trees.

5 lb. carton, 98c.

Pure Cottonseed Meal

Improves all soil conditions by stimulating beneficial bacteria; organic material containing nitrogen, phosphoric acid and potash.

5 lb. carton, 89c.

Copperas (Iron Sulphate)

Controls iron chlorosis (yellowing of leaves); helps acidify the soil.

5 lb. carton, 89c.

Pure Bone Meal (Sterilized)

Produces sturdy roots, better growth and color; a slow-acting source of phosphorus; completely safe.

5 lb. carton, 98c.

20% Super Phosphate

An inexpensive source of phosphorus; excellent for producing sturdy roots and enhancing growth and color; works quickly.

5 lb. 89c.

Dusting Sulphur

Controls chiggers, red spiders, mildew and black spots.

5 lb. carton, 89c.

Rose Food

Produces greenest leaves and essential new growth on which new blooms develop. A special bone meal, cottonseed meal, and blood meal diet plus iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN, in addition to primary plant foods.

1 lb. 39c, 5 lb. 98c, 10 lb. \$1.75, 25 lb. \$2.95.

All Purpose Plant Food

Contains cottonseed meal, bone meal, and blood meal; ideal for all soils, contains iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN. Corrects and prevents chlorosis in plants.

1 lb. 39c, 5 lb. 89c.

Aluminum Sulphate

Creates an acid condition in soil needed by camellias, azaleas, gardenias and other acid-loving plants; apply directly to the soil or mix with ferti.lome All Purpose Plant Food.

5 lb. carton, 89c.

Soil Sulphur

Use for soil acidification purposes; slow acting but very long lasting material, helps loosen tight soil.

5 lb. carton, 89c.

Muriate of Potash

A primary plant food; builds health, vigor, strength of stem, good color of fruit and flowers; gives resistance to adverse weather and disease.

5 lb. carton, 89c.

Blood Meal

A high nitrogen 100% organic plant food, quickly available, for all plants.

5 lb. carton, \$1.39.

ferti.lome Liquid Plant Food Concentrate

Contains iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN, in addition to primary plant foods. Leaves no harmful deposit on flowers, foliage—Spray or sprinkle on plants—Doesn't injure plants even in hot weather if used according to instructions. Mixes readily with all popular insecticides, fungicides. Dissolves instantly—leaves no sediment to clog sprayers—clean—odorless.

1 oz. 29c, 6 oz. 69c, 1 lb. \$1.39, 25 lb. \$9.95.

WEED KILLER

The Modern Way to TRIM & EDGE

ferti.lome Perma-Trim

The new modern way to trim and edge. More effective and safer weed killer. Perma-Trim kills by contact mainly, thereby reducing hazards of drift or fumes that cause injury to desirable shrubs, flowers, trees, etc. Weeds: Use for spot control; trim and edge along flower beds, fences, between patio stones, edge of lawn, gravel driveways, etc.

1 gal. jug, \$2.95.

National EEZY WEAR

Garden Gloves

Used the year round for gardening, garage, housework, furnace, yard, painting, etc. Sizes—small, medium and large.

EEZY-WEAR—\$2.00 per pair.

TRAINETTES

A strong and easy to use trellis for sweet peas and other light climbing vines. Height 5 feet.

6 ft. length 75c; 8 ft. 95c; 15 ft. \$1.35, postpaid.

NEW!
DIFFERENT!

Weatherized

TRANSPLANTONE—It is used extensively in setting out tomato, sweet potato, cabbage, tobacco, and other plants, for early maturity and larger crop.

Price: ½-oz. pkt. 35c; 3-oz. can \$1.25; 1-lb. can \$4.00.

PEAT MOSS—You, too, can have a beautiful lawn and garden. Use Peat Moss, nature's finest soil conditioner. This miracle maker of humus puts millions of tiny sponges to work, providing soft, loose, fertile soil that allows air circulation and the penetration of the sun's rays. It stores plant food that would otherwise be washed away and wasted.

Standard bale \$5.95.

FLORAVATE—Two grades, coarse and fine. Mulch instead of cultivate. Save labor, save watering, save money. Makes dry sandy soil hold water and fertilizer like a sponge. Loosens tough clay soil. Does not burn. Use Floravate—sturdier plants—more flowers.

100-lb. bale \$2.40; 5 bales \$2.35 each.

SEMESAN COSTS ONLY

¼c to 2c A POUND OF SEED

For Vegetable and Flower Seeds—Diseases carried on the seed often reduce germination and cause a poor stand, lowered quality, and unsatisfactory yields. Destroy these disease organisms without injuring the seed by treating your seeds, bulbs, roots, corms, and tubers with Semesan. Easily and quickly applied as a dust or liquid. Effective in controlling damping-off of seedlings and cuttings.

SEMESAN for small seeds. Use 1 oz. for 15 lbs.

4 oz. \$2.50; 12 oz. \$5.95, postpaid.

SEMESAN BEL — Apply to whole or cut seed potatoes either as a dry powder or as a liquid dip. Use 1 oz. for 3 bushels.

3 oz. \$1.45.

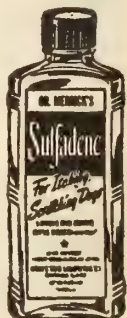

G & O ROSE (Balanced Plant Food)—An organic, no filler, 100% plant food of dried blood, fish scrap, bone meal, potash, cotton seed meal, guano, nitrate of soda, sulphate of ammonia, poultry manure powder and phosphate.

5 lbs. \$1.50; 10 lbs. \$2.00; 25 lbs. \$3.85, not postpaid.

SULFADENE

Don't Blame Fleas, Mange . . . Diet! If your dog itches, scratches continually, it is probably not due to fleas, mange or diet. 2 to 1 it's FUNGITCH, grass-borne fungus infection long a puzzle to science. FUNGITCH starts as an itch followed by dandruff-like scales or sores with brownish edges and mouldy odor—or infection in ears, in paws, underbody, tail or eyes. May lead to most serious results—costly care—even total loss. Now a noted specialist's discovery — SULFADENE — applied externally, stops itching in minutes . . . clears up scales and sores in a few days.

Postpaid, 4 oz. size \$1.15.

PLANT FRUIT

- APRICOT**—3 to 4 ft. \$1.50 each. Not prepaid.
- APPLES**—Early Red Bird, Early Harvest, and Delicious—3 to 4 ft., \$1.35 each. Not prepaid.

- PLUMS**—Abundance, Burbank and Red June. 4 to 5 ft., \$1.75 each. Not prepaid.
- FINEST GRAPES**—White Niagara, Moore's Early, Concord and Lutte. \$1.00 each.

PANSY PLANTS — Ready Oct. 15

SWISS GIANT PANSY MIXED—A super strain with gigantic blooms in rich and beautiful colors. To obtain the very largest size Pansy blooms, they should be trimmed twice. They require at least morning sun, a great deal of fertilizer and a well drained soil. Strong plants from seed beds.

100 for \$2.75, postpaid. 1,000 for \$22.00, not postpaid.

BERRY - SET for Bigger Berries

Makes berries grow larger, often 50% to 100% bigger, meatier, sweeter, more luscious tasting. Increases berry yields. Easy to use: Just mix powder with water and spray the open blossoms.

1/2 oz. 25c; 3 oz. \$1.05, postpaid
